

Results from TALIS 2024

The state of teaching through the eyes of teachers

Andreas Schleicher

OECD Directorate of Education and Skills

October 2025

What is TALIS

The **largest international survey** of teachers and principals. By **capturing the voices of teachers and principals**, TALIS helps policymakers **improve teaching quality and learning environments**.

4 surveys to date:

2008: 24 education systems

2013: 38 education systems

2018: 48 education systems

2024: 55 education systems

TALIS options:

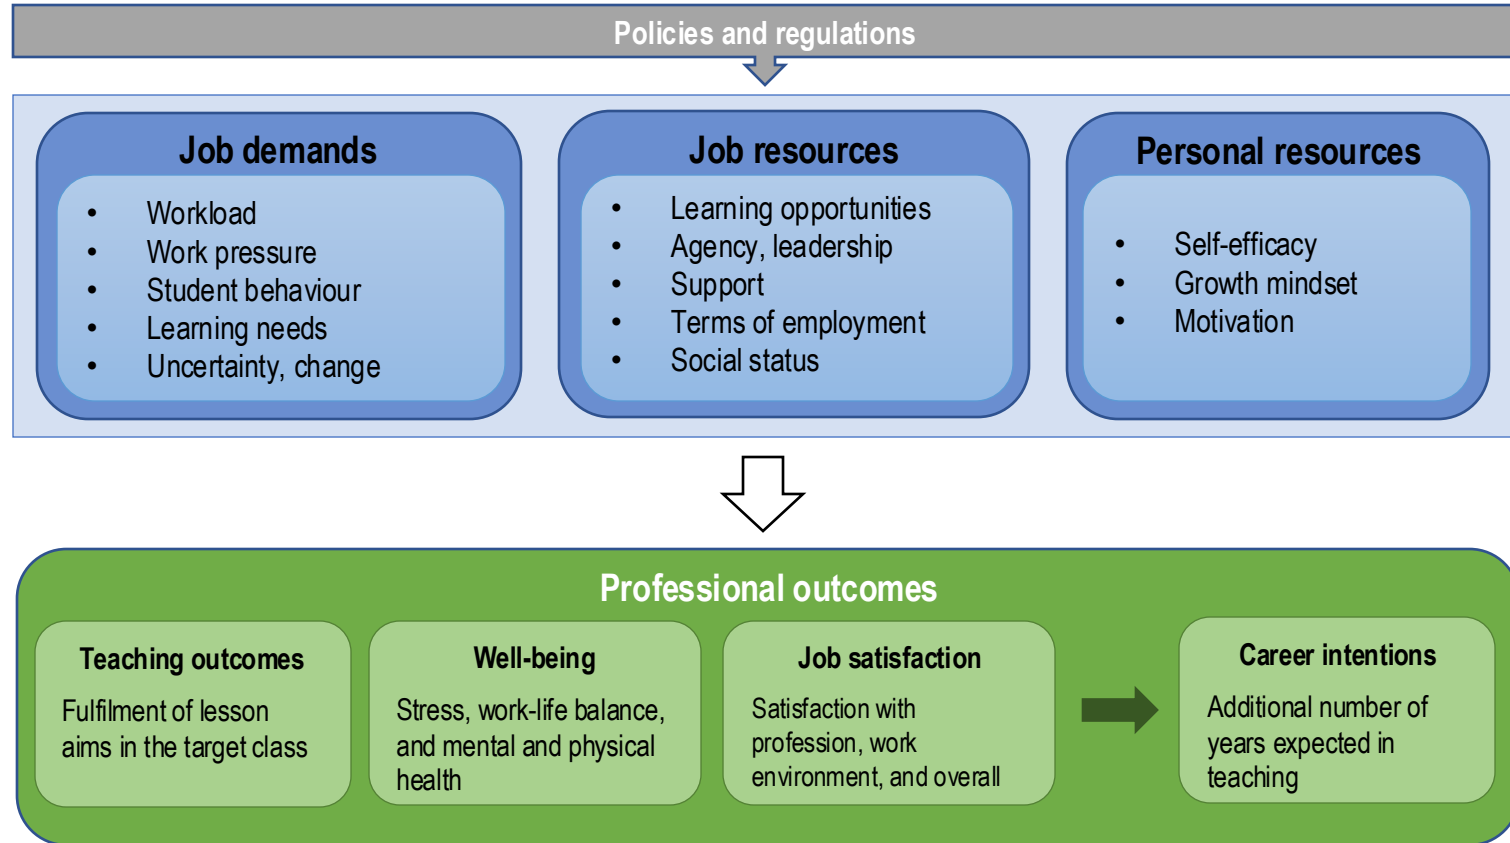

Survey of primary teachers (ISCED 1)

Survey of upper secondary teachers (ISCED 3)

Teacher Knowledge Survey

TALIS concepts

Personal factors

(teacher demographics, years of experience and career pathways)

Contextual factors

(school and classroom characteristics)

A photograph of a classroom scene. A Black female teacher with curly hair, wearing a beige cardigan over a maroon top, stands in the center-right, smiling and looking down at her hands. Several young students are seated at desks, with their hands raised in the air, indicating an interactive lesson. The classroom has large windows in the background, and a calendar is visible on the wall. The overall atmosphere is positive and engaged.

Are teachers thriving or surviving?

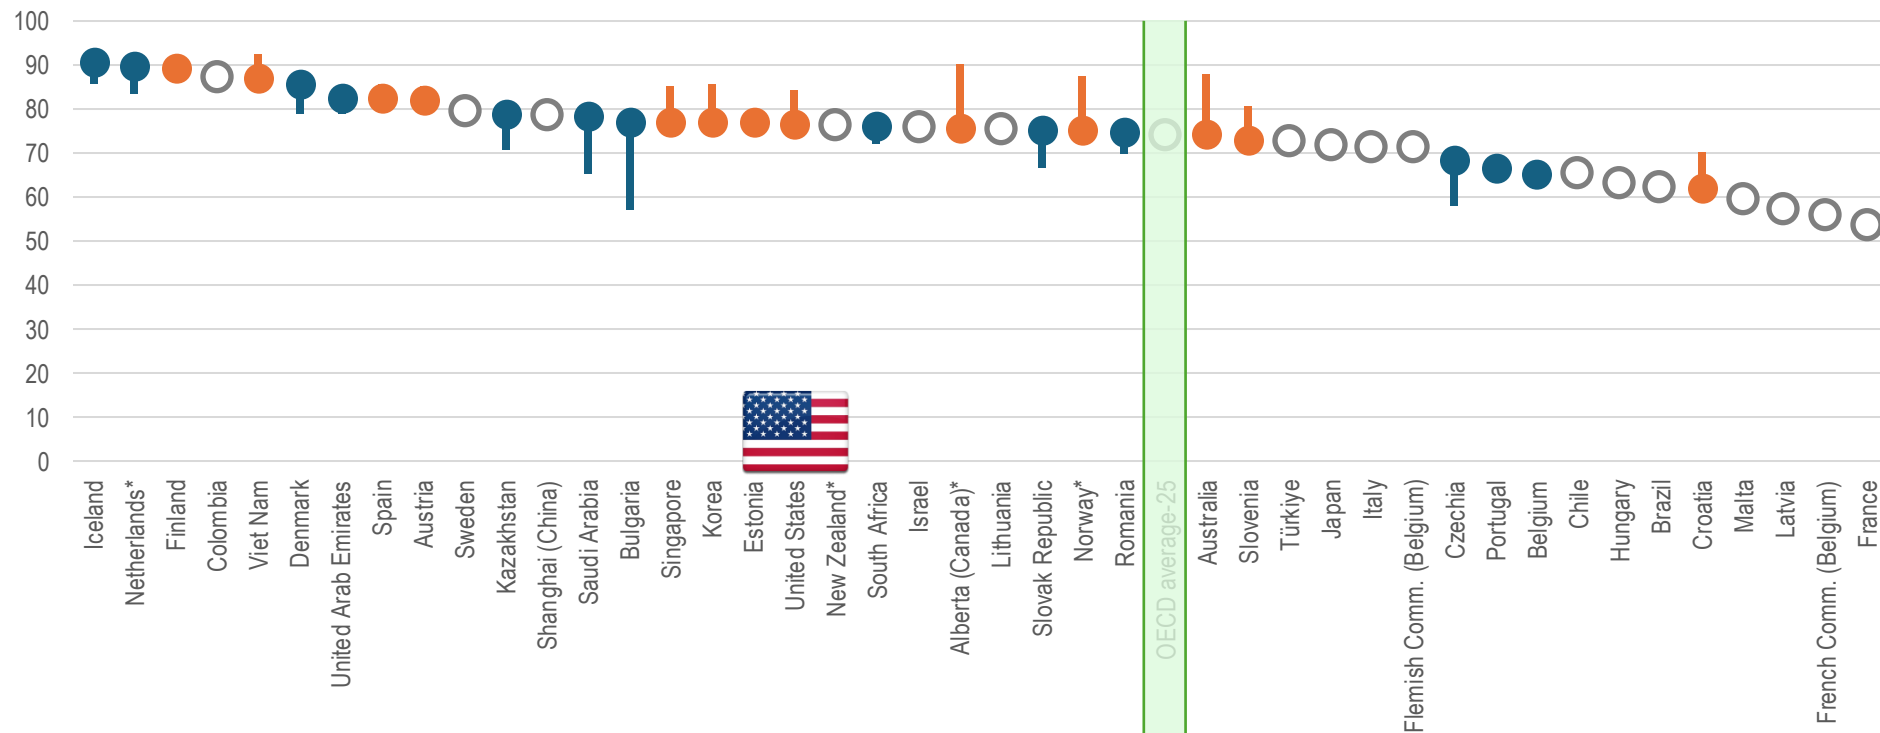

Teacher job satisfaction

Teachers' satisfaction with the profession

Share of teachers who "agree" or "strongly agree" that the advantages of being a teacher clearly outweigh the disadvantages

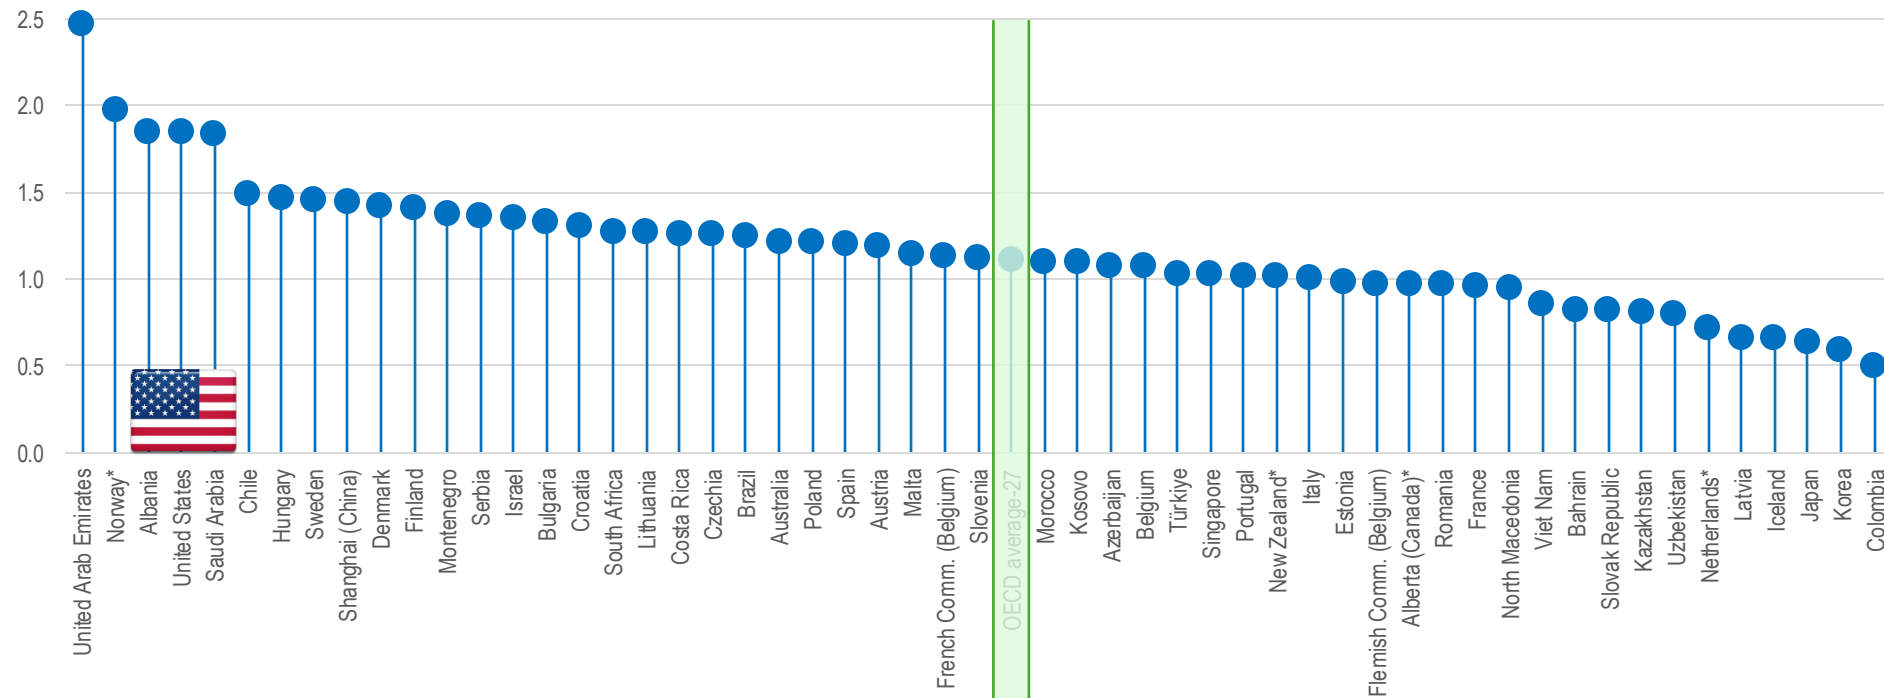

● Increase, ● Decrease and ○ non-significant change from 2018 to 2024

Relationship with the principal matters for job satisfaction

Change in the scale of teachers' job satisfaction associated with teachers "agree[ing]" or "strongly agree[ing]" that the principal has good professional relationships with staff

● Positive statistically significant differences

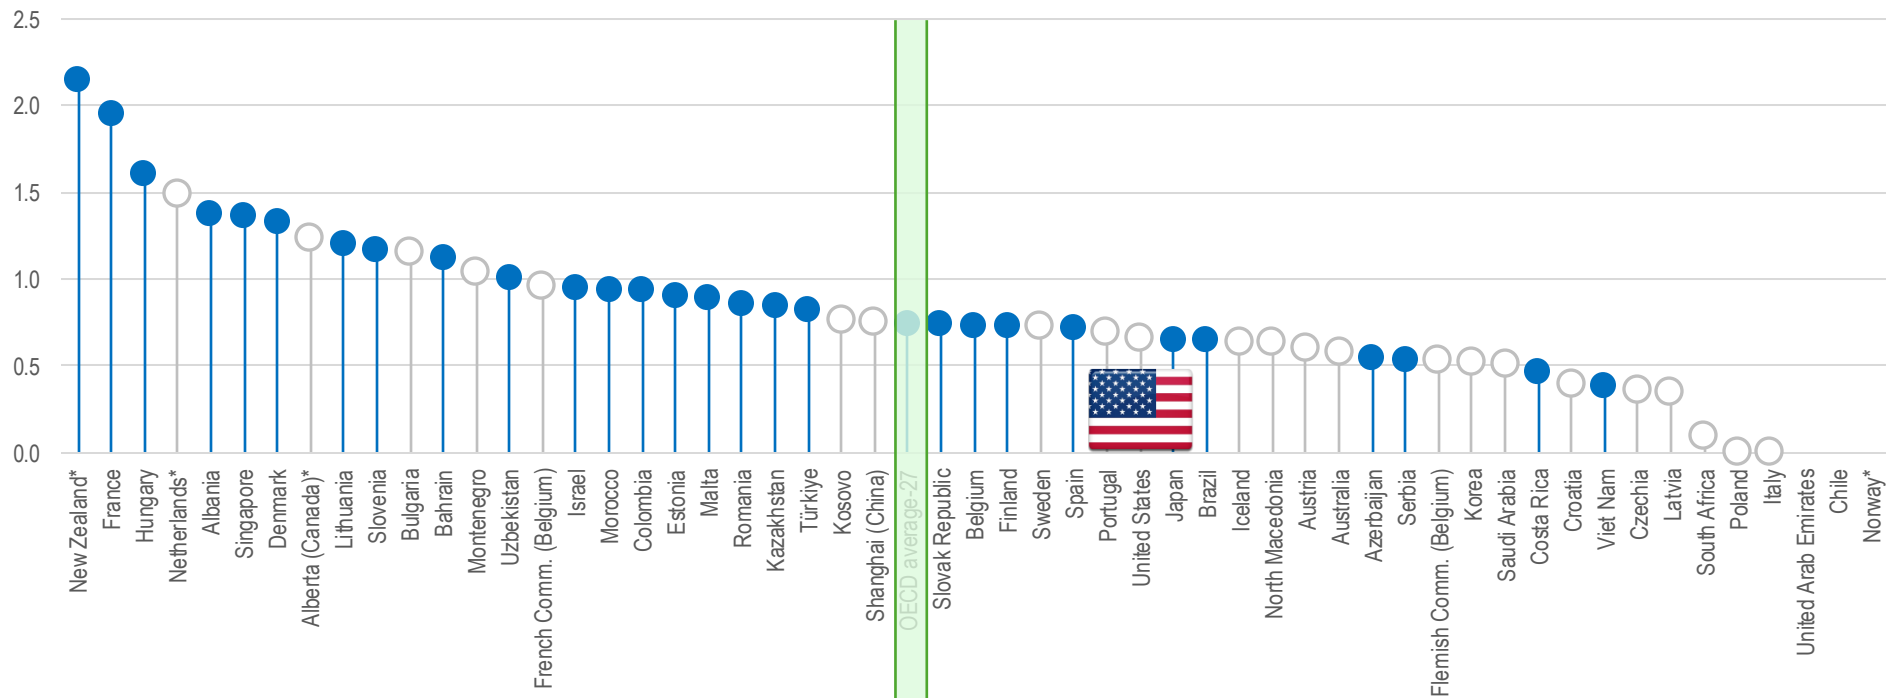

Relationship with students also matters for job satisfaction

Change in the scale of teachers' job satisfaction associated with teachers "agree[ing]" or "strongly agree[ing]" that teachers and students usually get on well with each other

● Positive statistically significant differences

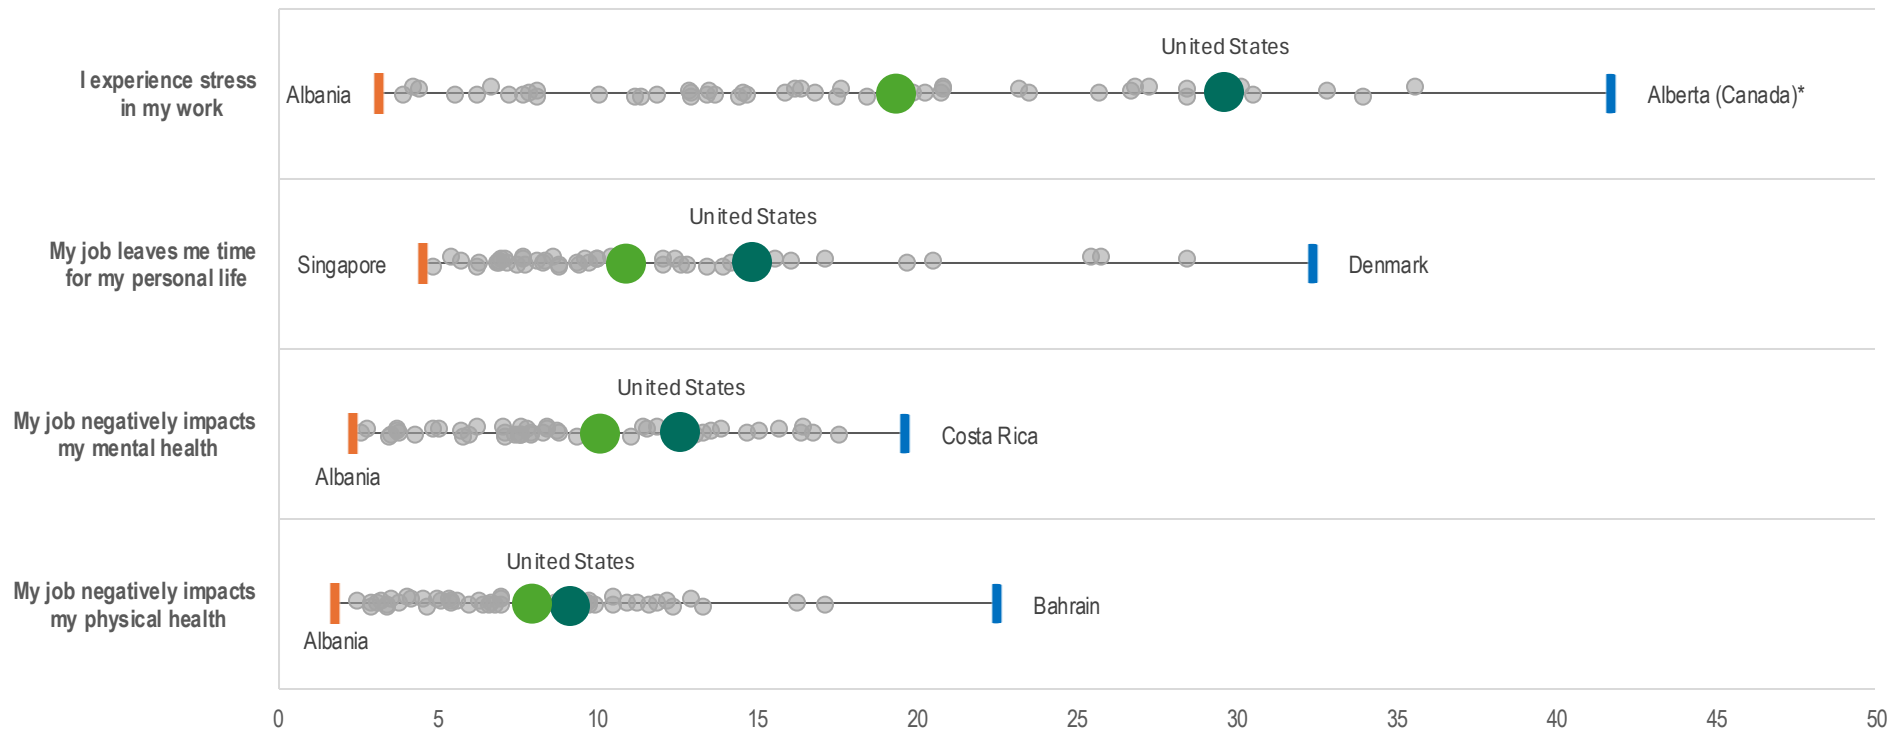

Teacher well-being

Share of teachers who report experiencing the following occurrences "a lot" in their work

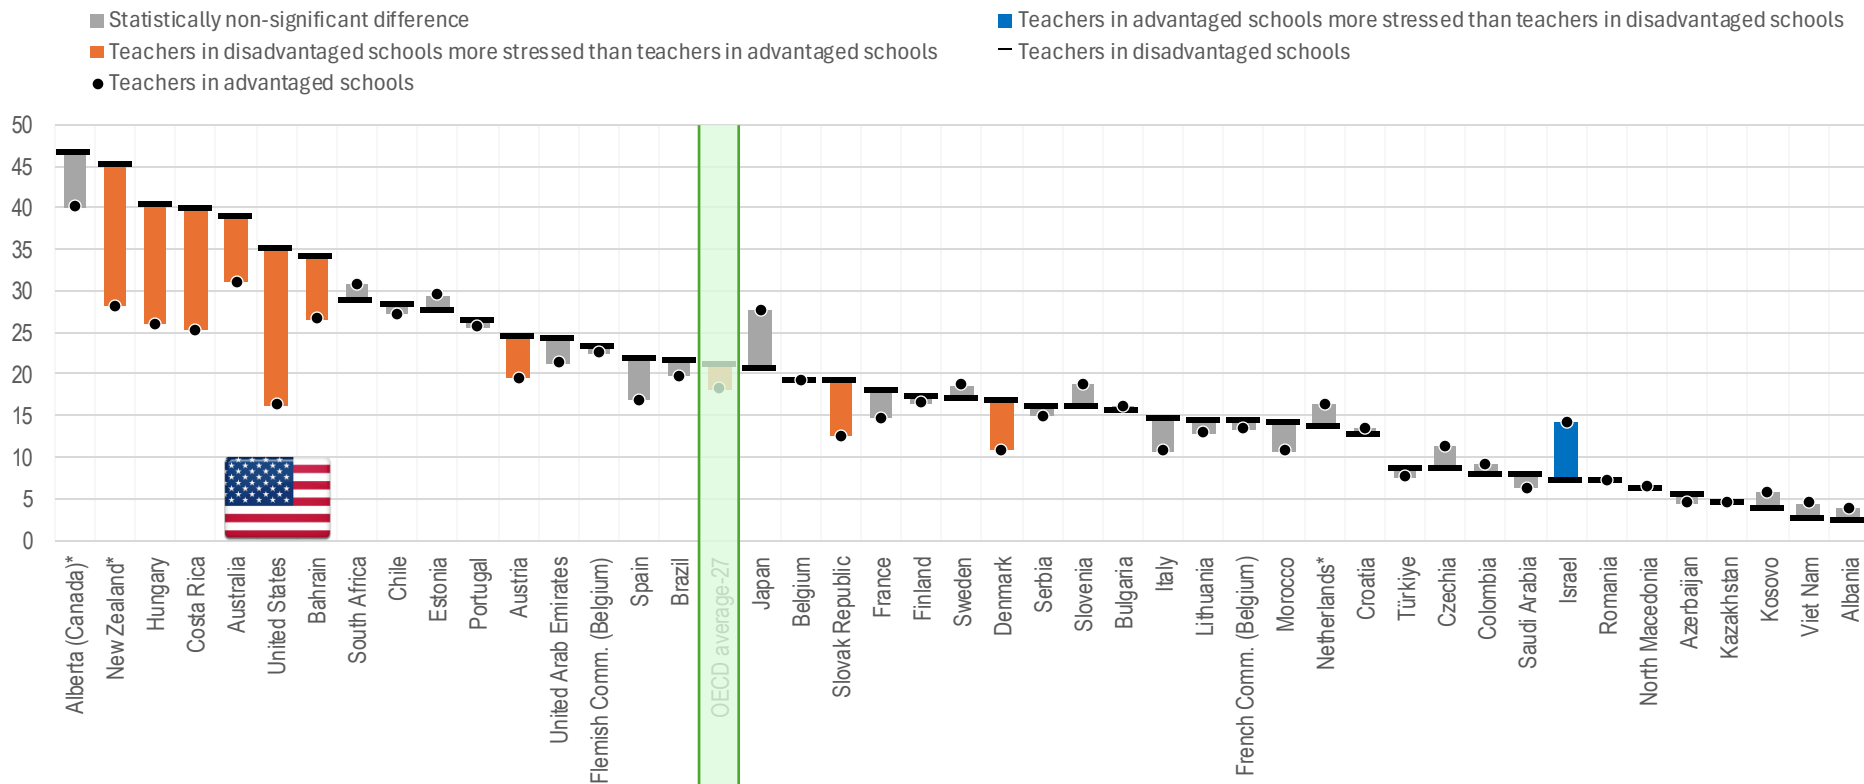

● OECD average ● Education systems | Lowest value | Highest value

Teachers in disadvantaged schools are more stressed

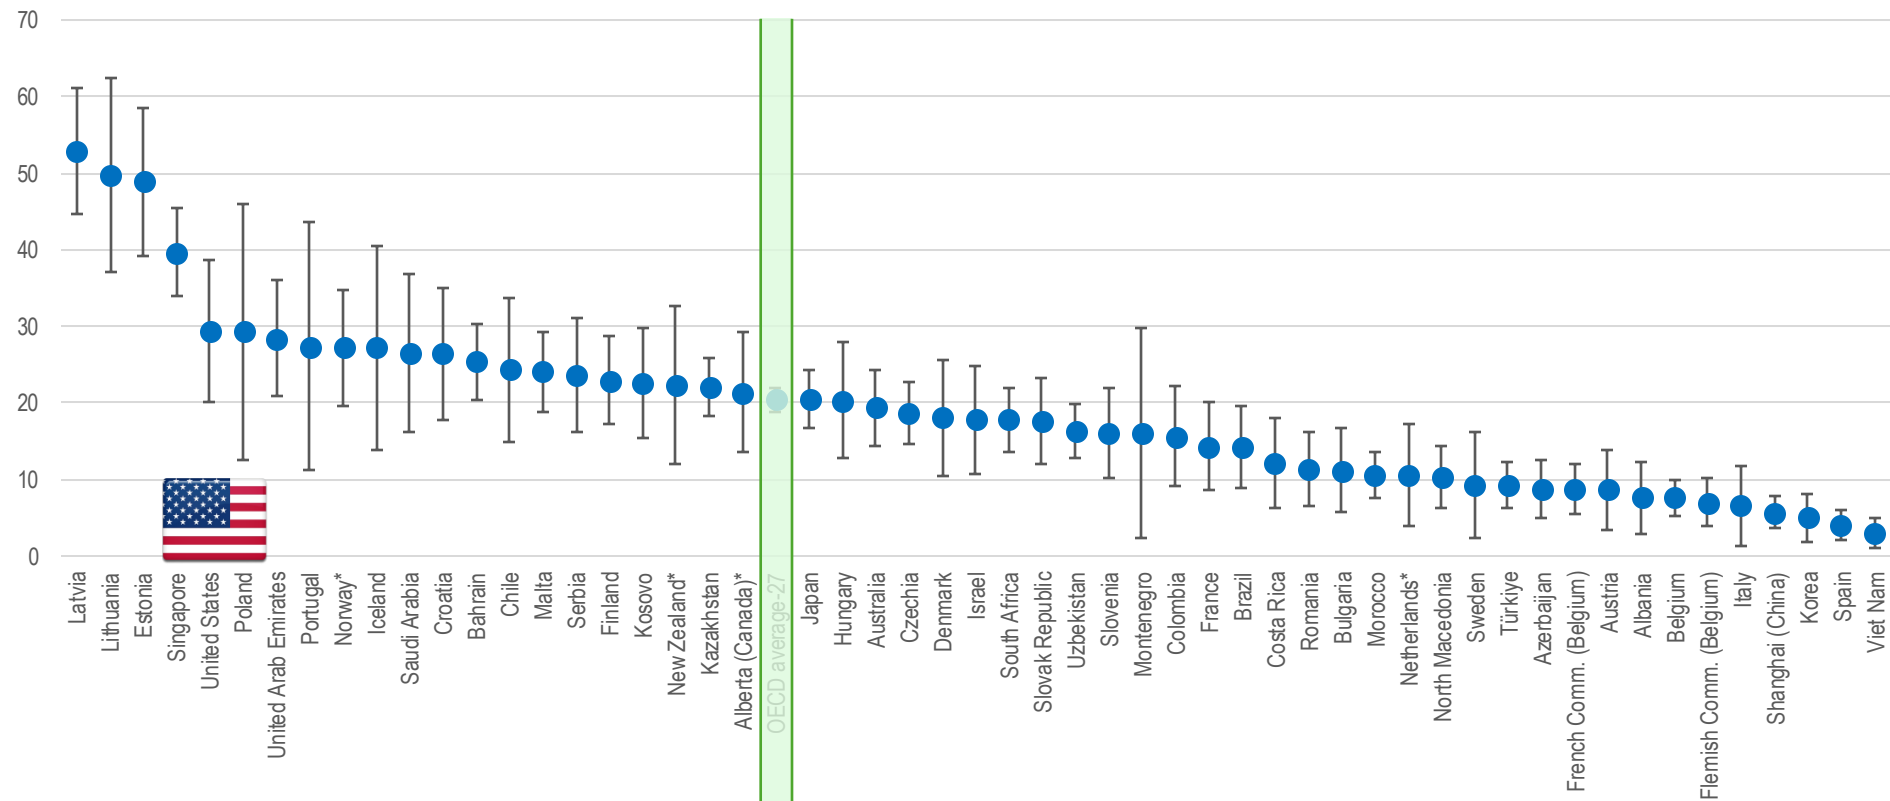

Share of teachers who report experiencing stress “a lot” in their work

Share of young teachers wishing to leave the profession

Share of teachers under the age of 30 who intend to leave teaching within the next five years

A photograph of a classroom scene. In the foreground, a female teacher with short blonde hair, wearing a light pink long-sleeved shirt and a lanyard, is looking upwards and to the right, holding a red marker and a piece of paper. In the background, several students are seated at white desks, looking towards the teacher. The classroom walls are covered with various educational posters, including a world map and a large red and yellow poster. The lighting is bright, coming from overhead fluorescent lights.

What stresses teachers most?

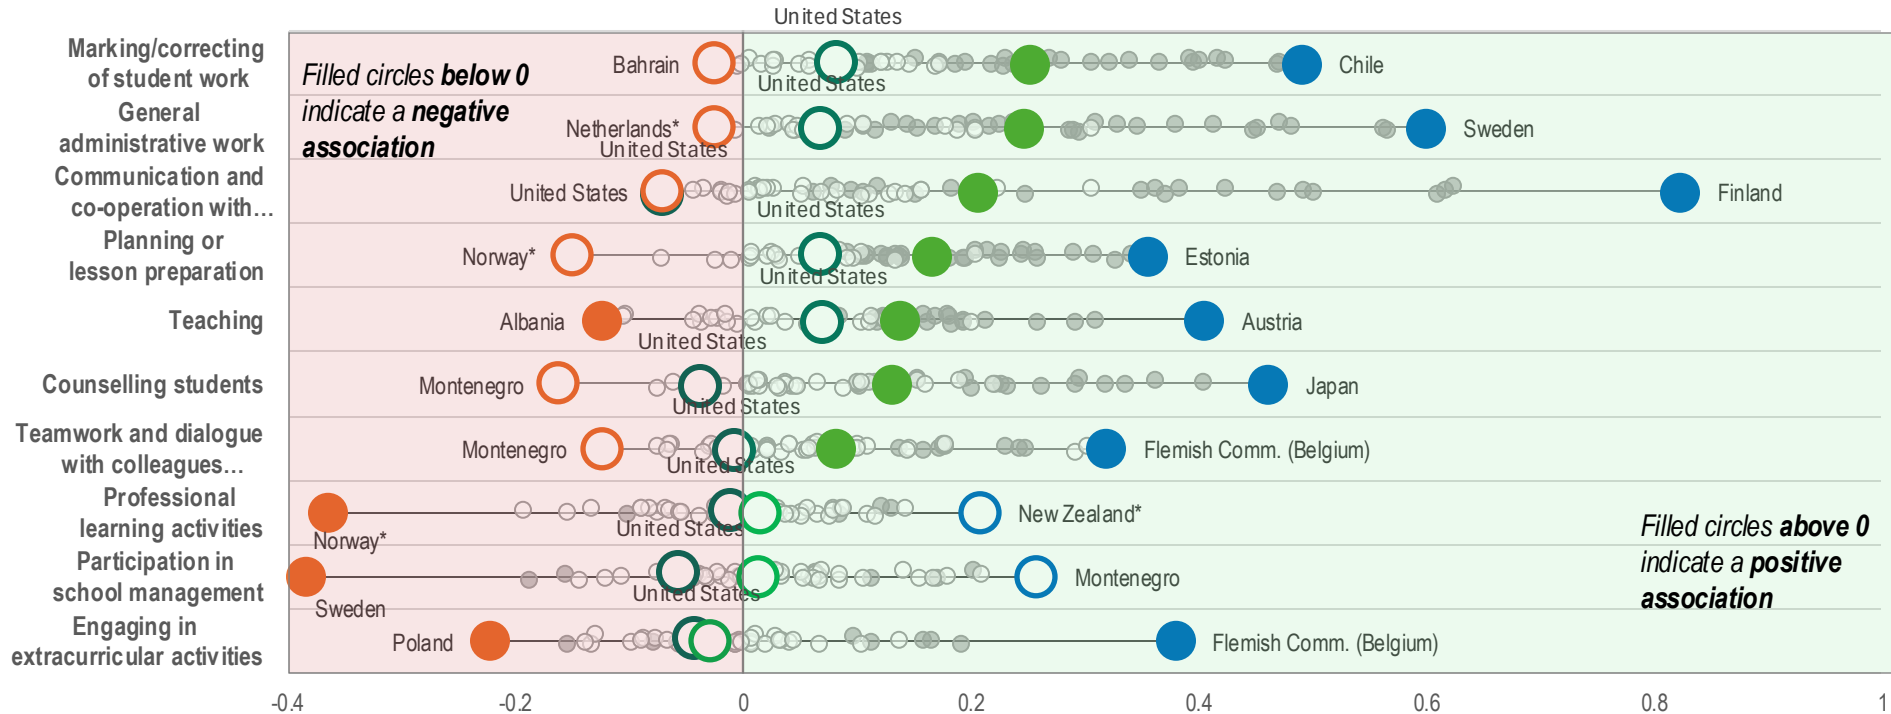

Teacher job satisfaction

Different activities relate to stress in different ways

Change in the scale of teachers' workplace well-being and stress associated with an increase in the hours full-time teachers report having spent on the following activities

○ ● OECD average ○ ● Education systems ○ ● Lowest value ○ ● Highest value

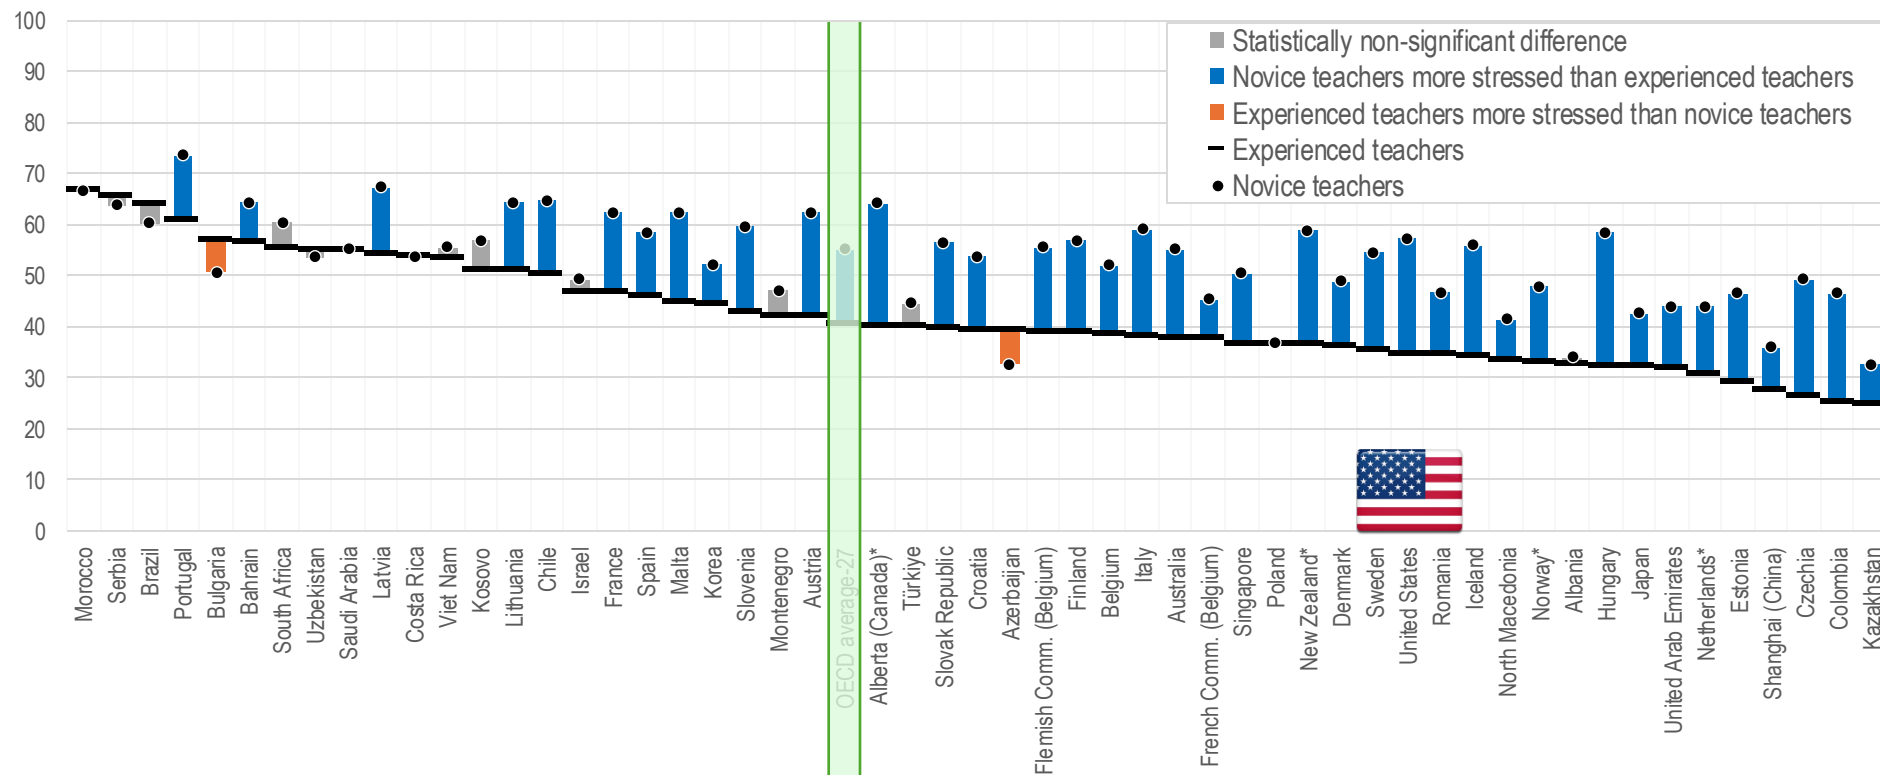

Managing classroom discipline

Maintaining discipline is more stressful for novice teachers

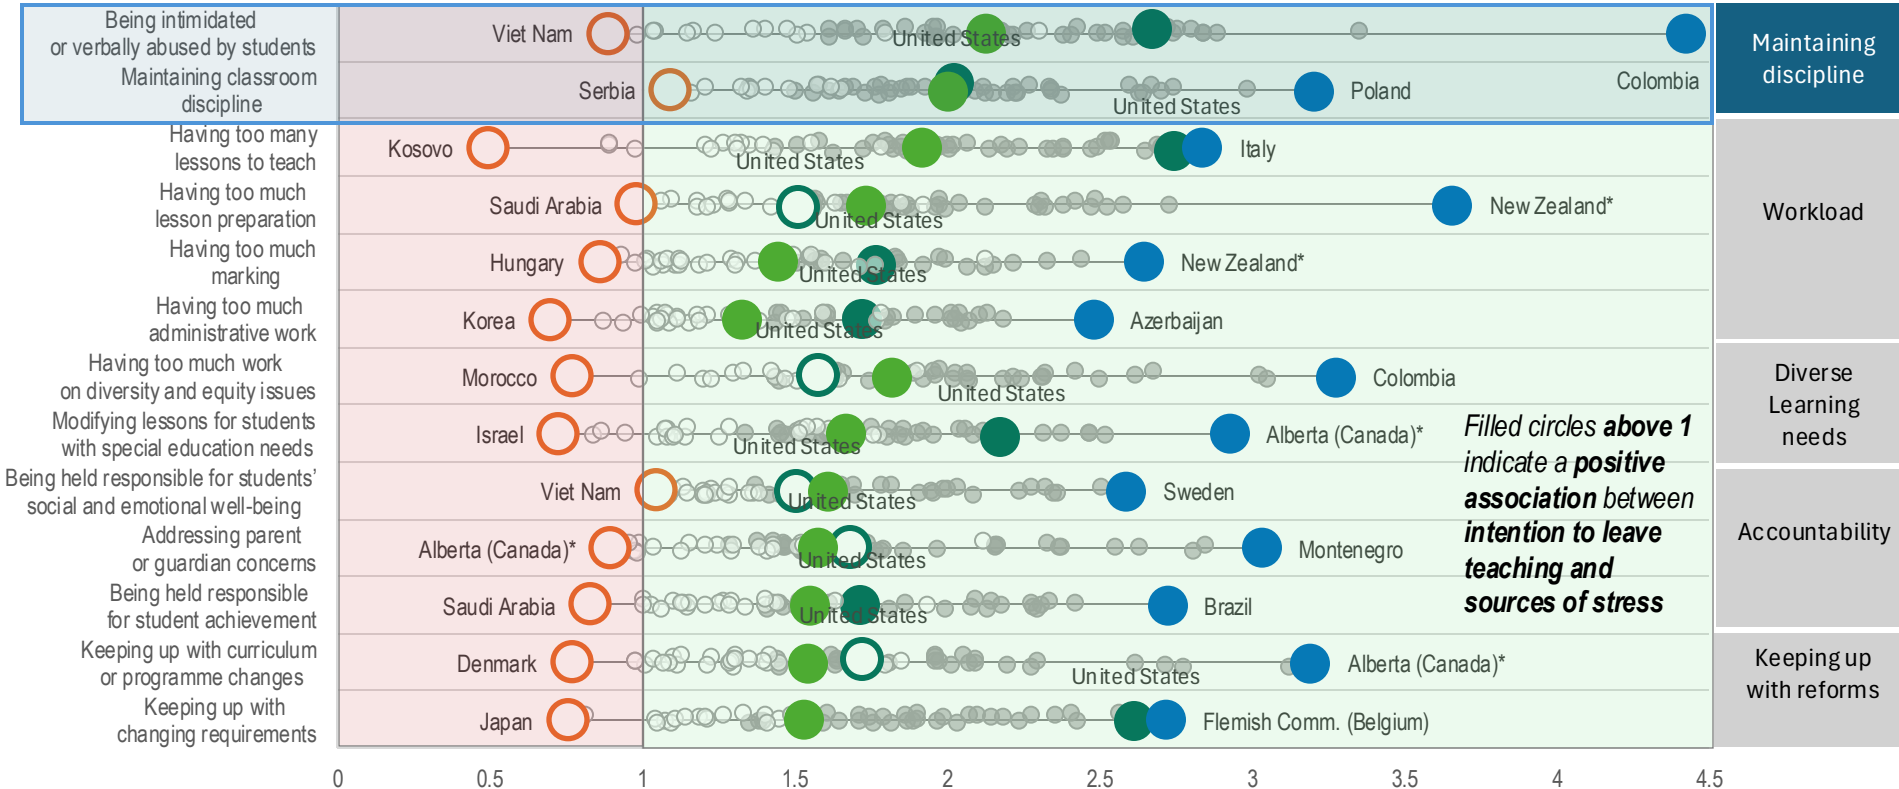

Share of teachers who report that maintaining classroom discipline is a source of stress “quite a bit” or “a lot”

Maintaining discipline as a stressor is an important predictor of teachers' intention to leave teaching

○● OECD average ○● Education systems ○● Lowest value ○● Highest value
United States

A photograph of a classroom. A male teacher in a light blue shirt and dark tie stands at the front, holding papers and pointing towards a large red and yellow display board on the wall. The board is covered with various papers, including a world map and several charts. Students are seated at desks in the foreground, some looking at their laptops and others at their papers. The classroom has a modern feel with white walls and a grey floor.

Is teaching an attractive job?

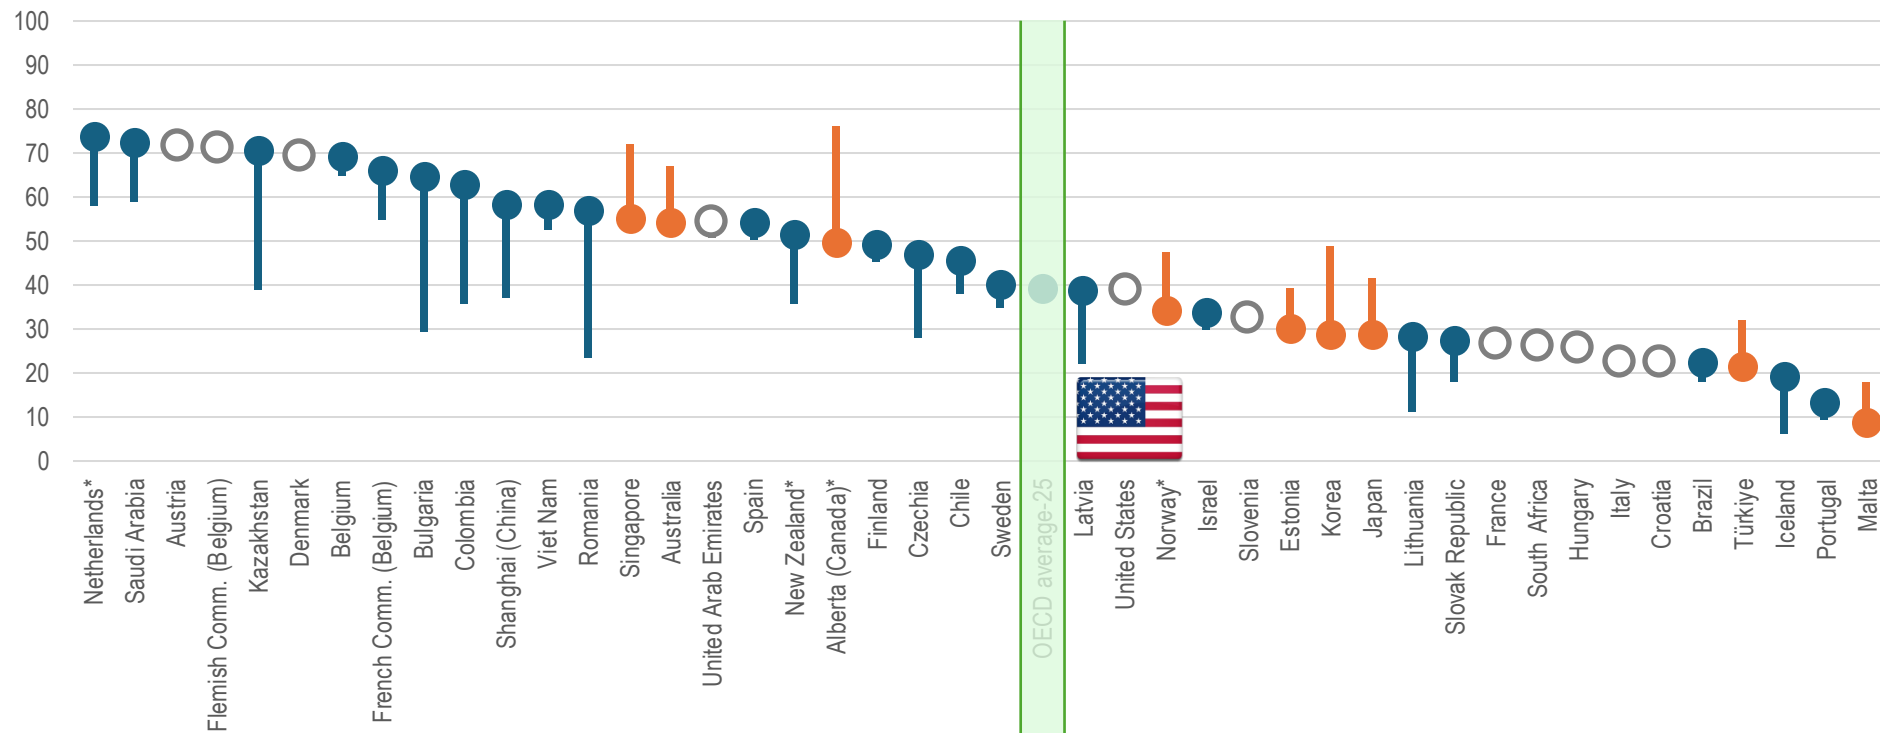

Teacher working conditions

Teachers' satisfaction with their salaries

Share of teachers who “agree” or “strongly agree” that they are satisfied with their salaries

● Increase, ● Decrease and ○ Statistically non-significant change from 2018 (lollipop tail) to 2024 (lollipop head)

**Are experienced teachers teaching where
they are needed most?**

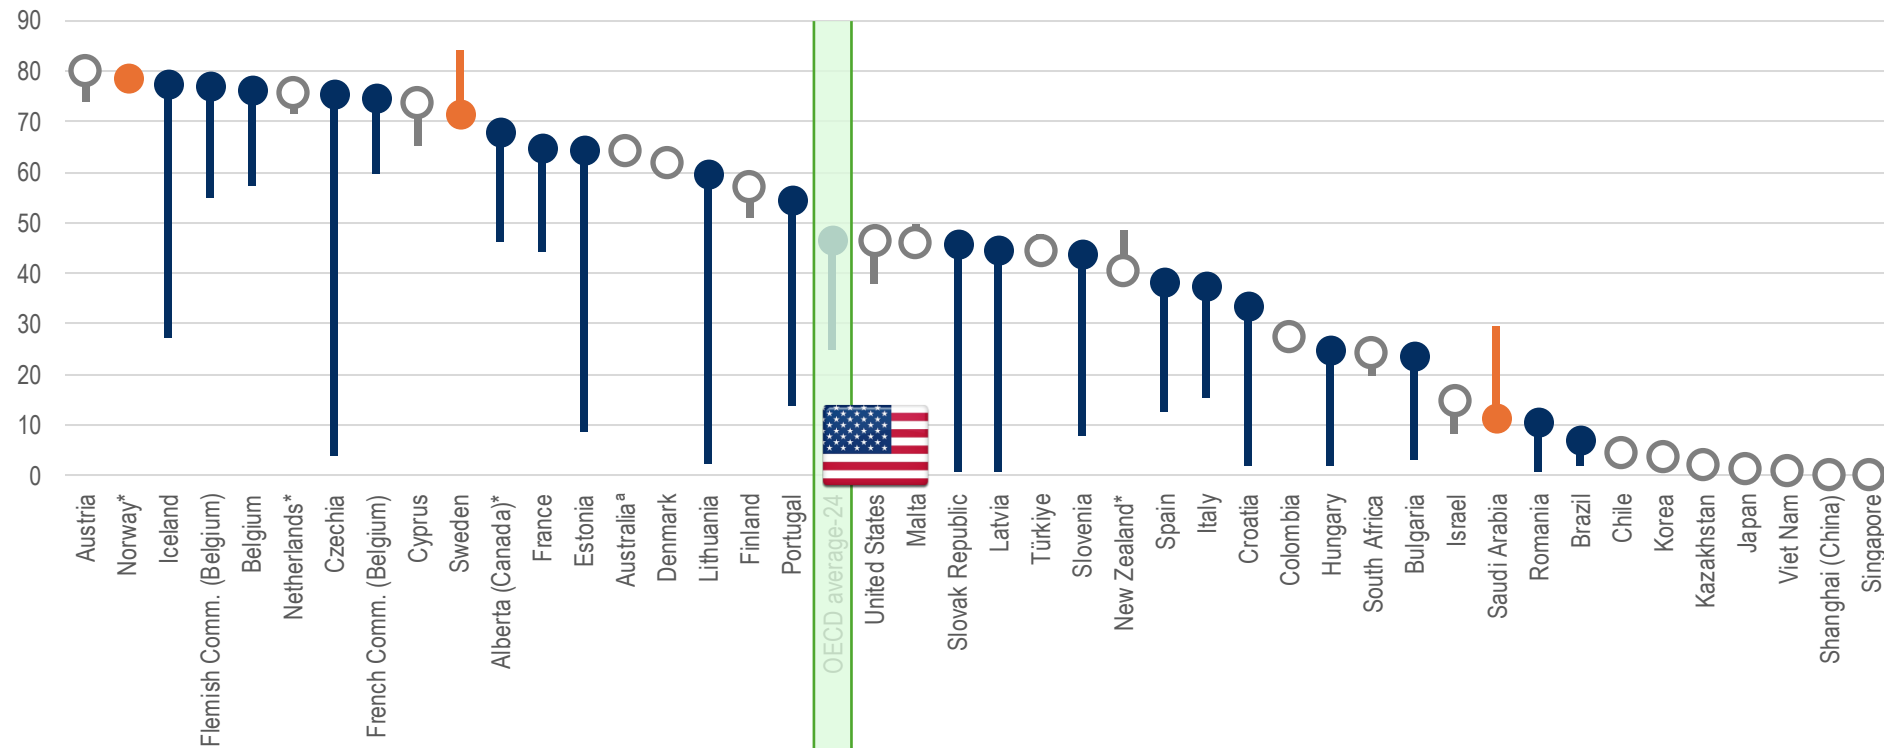

Aligning resources with needs

More students are refugees

Share of teachers in schools where at least 1% of students are refugees

● Increase, ● Decrease and ○ Statistically non-significant change from 2018 (lollipop tail) to 2024 (lollipop head)

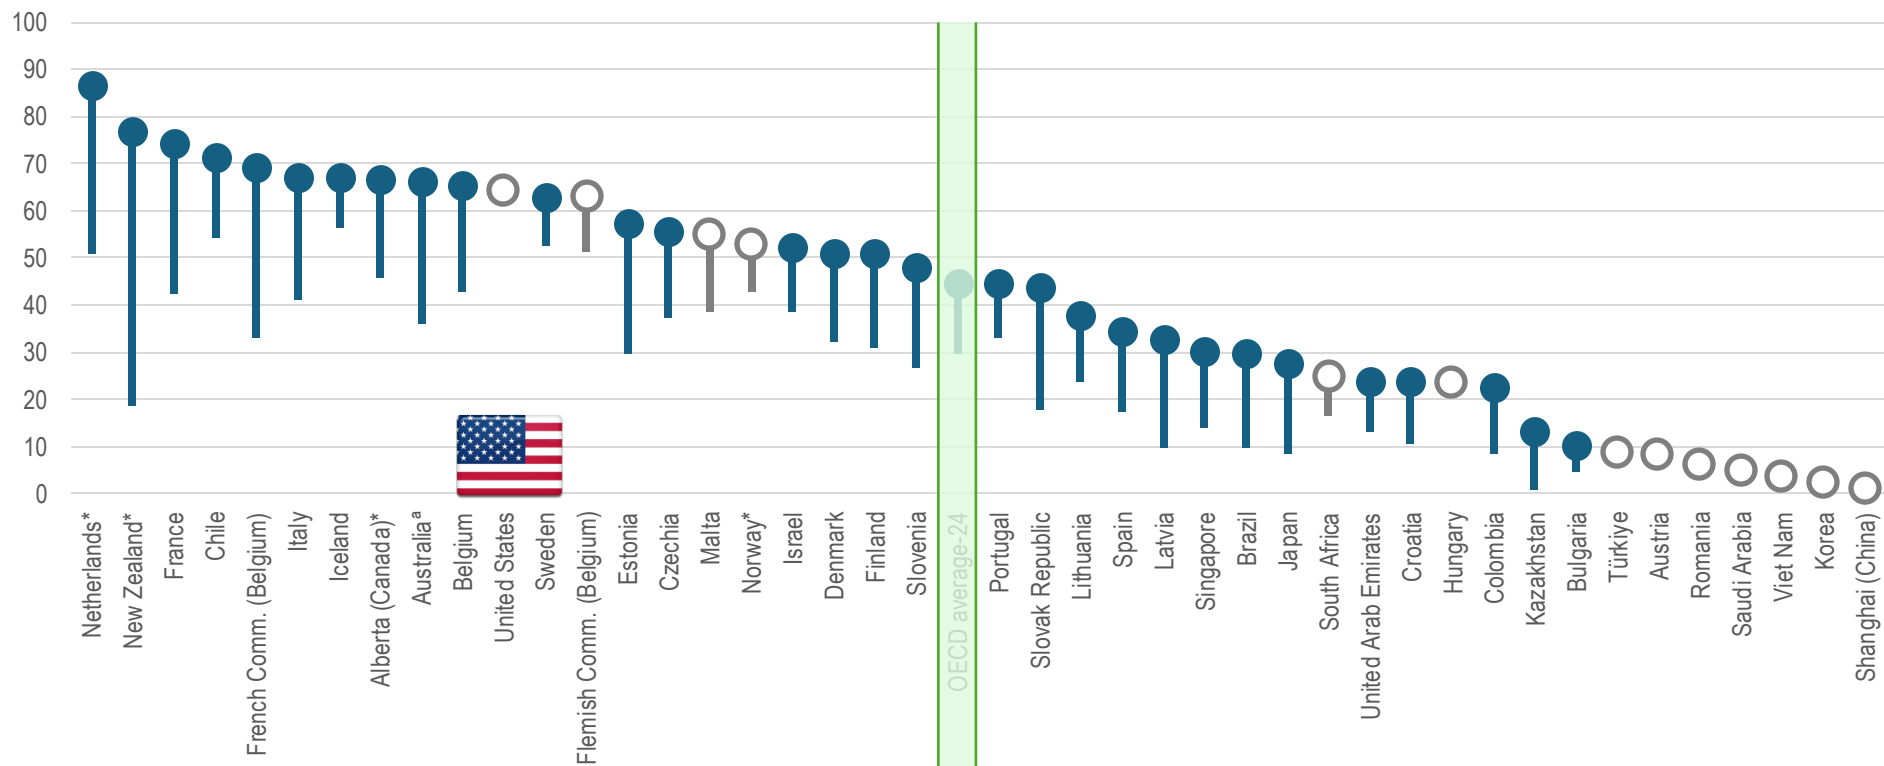

More students are diagnosed with special needs

Share of teachers in schools where at least 10% of students have special education needs

● Increase and ○ Statistically non-significant change from 2018 (lollipop tail) to 2024 (lollipop head)

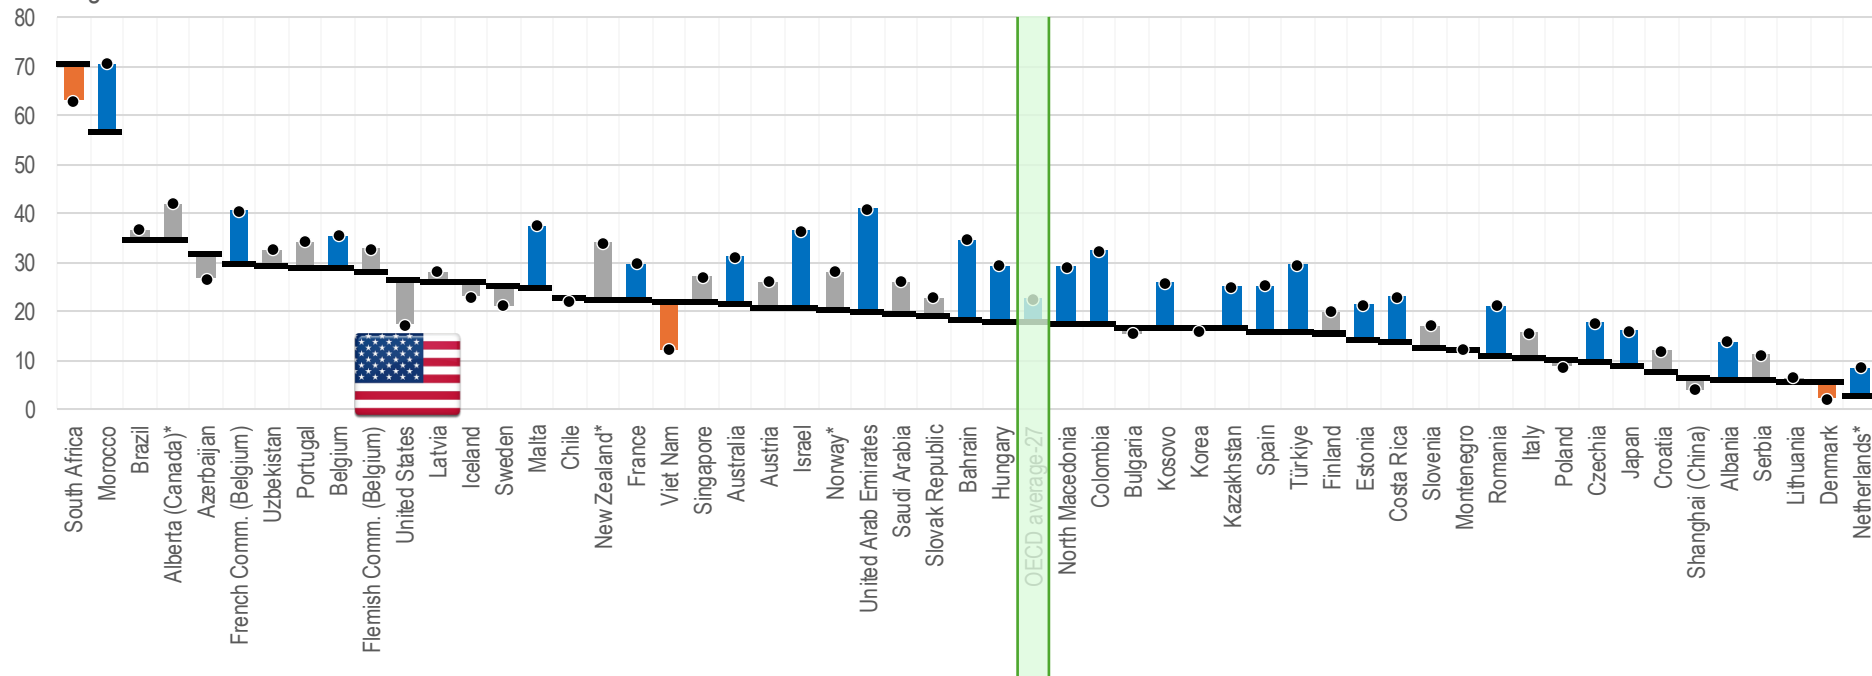

Teachers under age 30 are allocated to more difficult environments

Share of teachers with more than 10% of students with difficulties in understanding the language of instruction

- Older teachers report more students with language difficulties than younger teachers
- Younger teachers report more students with language difficulties than older teachers
- Statistically non-significant difference
- Older teachers
- Younger teachers

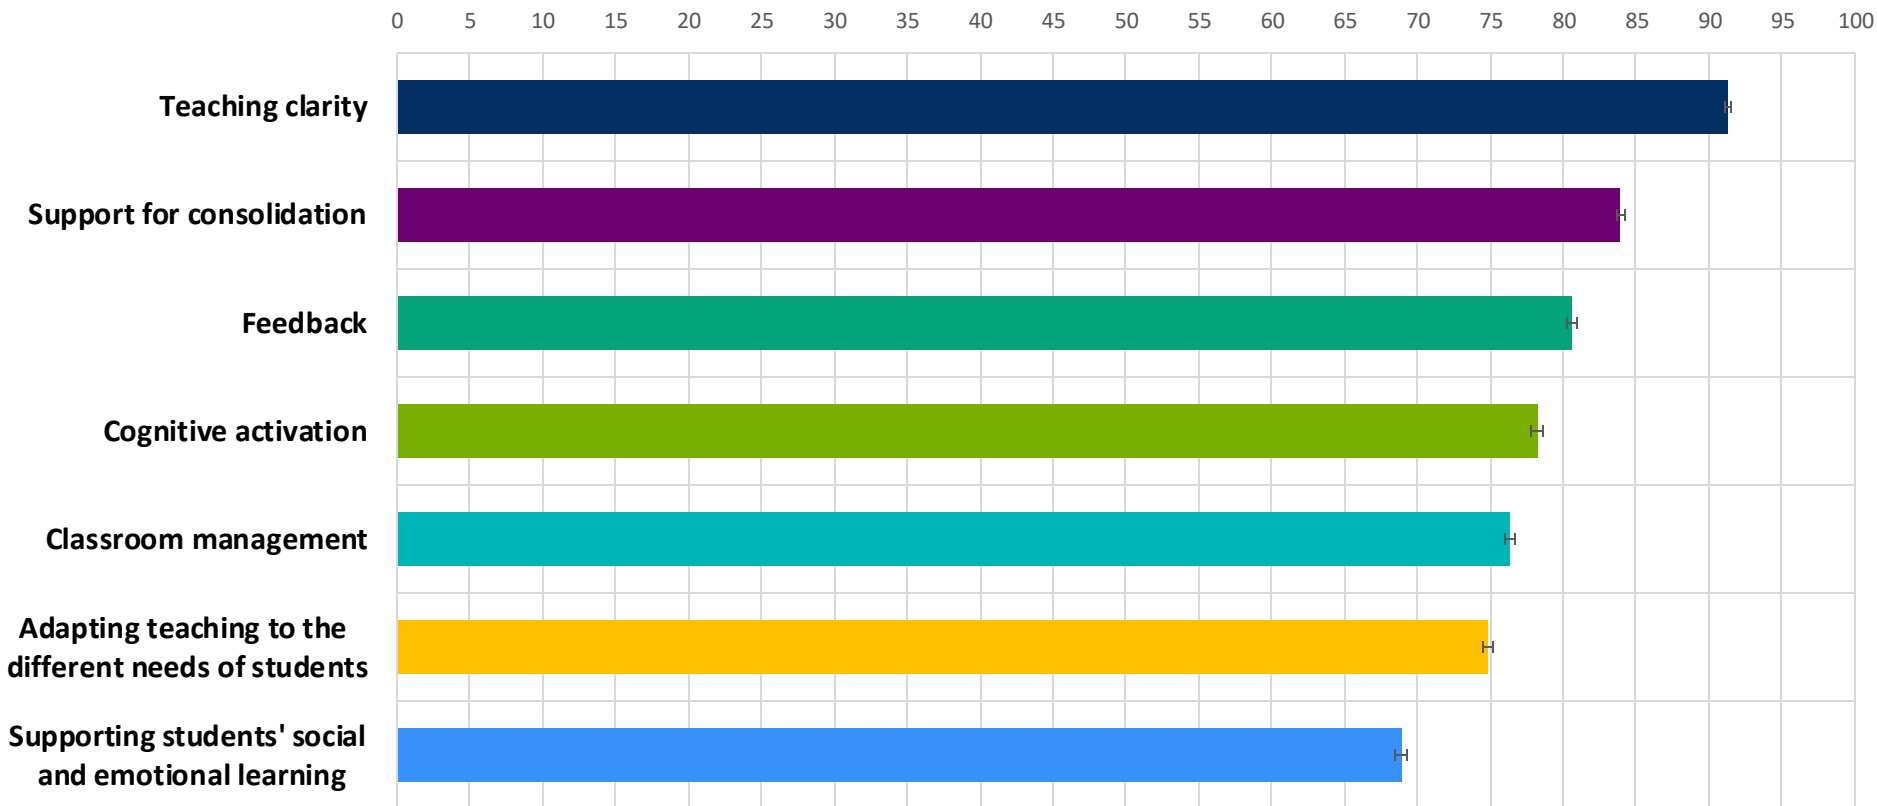

Beyond academic outcomes

Teacher social and emotional skills

Teachers are less successful in supporting students socially and emotionally

Share of teachers who fulfill their lesson aims in...

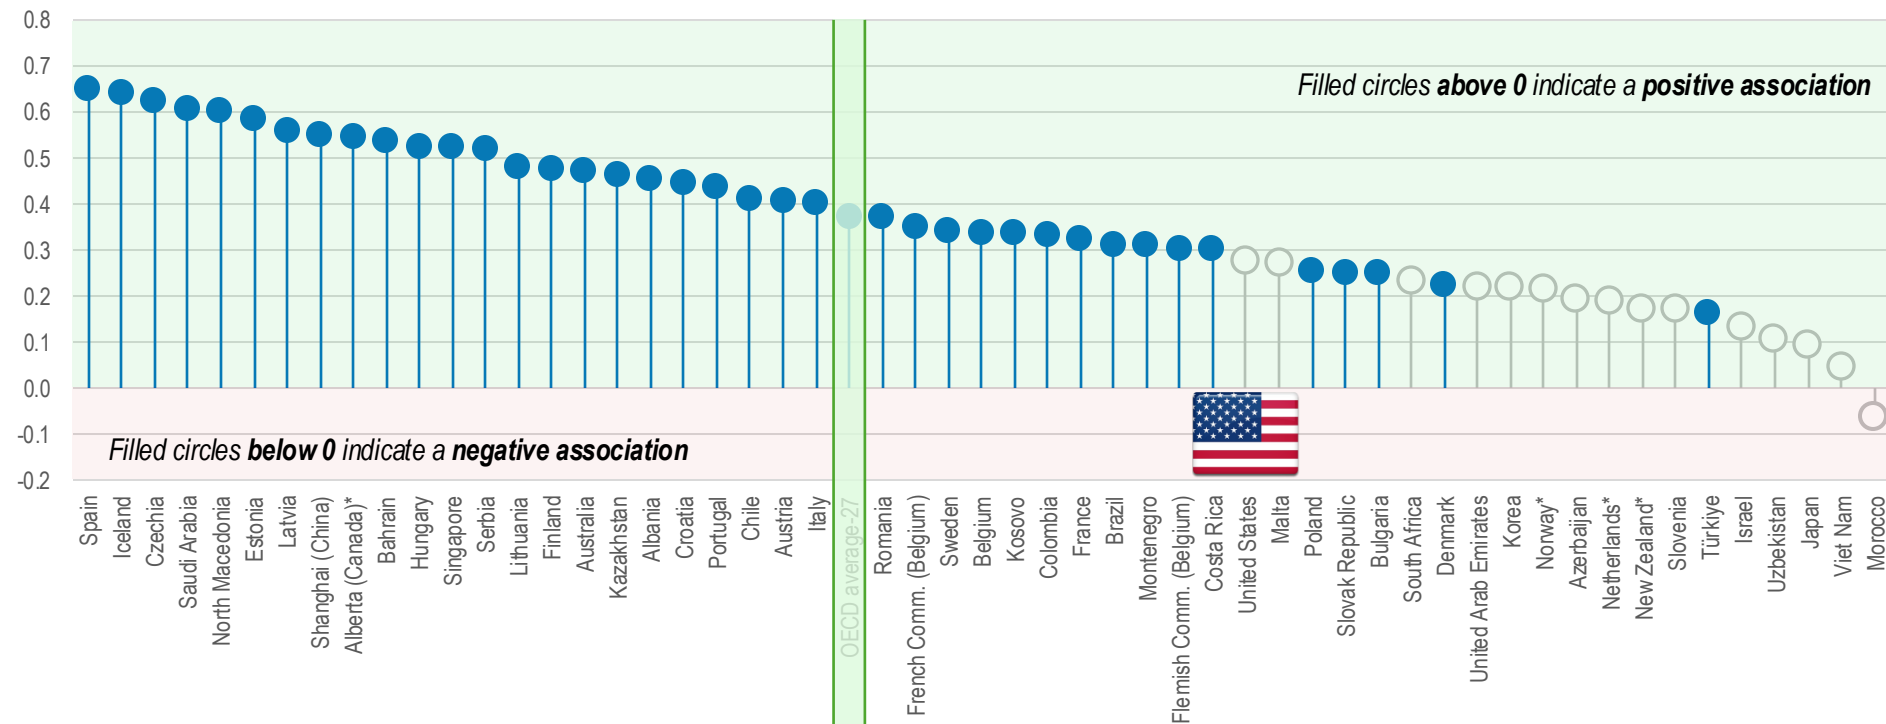

Female teachers are more likely to use practices that develop students' social and emotional skills

Change in the scale of teachers' social and emotional skill development associated with teacher gender (female)

● Positive statistically significant change

A photograph of a classroom scene. A female teacher with long brown hair is leaning over a desk, smiling and pointing at a laptop screen. A young boy with dark hair is sitting at the desk, looking at the laptop. Other students are visible in the background, some using laptops. The room has large windows in the background, letting in natural light. A semi-transparent white banner is overlaid across the middle of the image, containing the text.

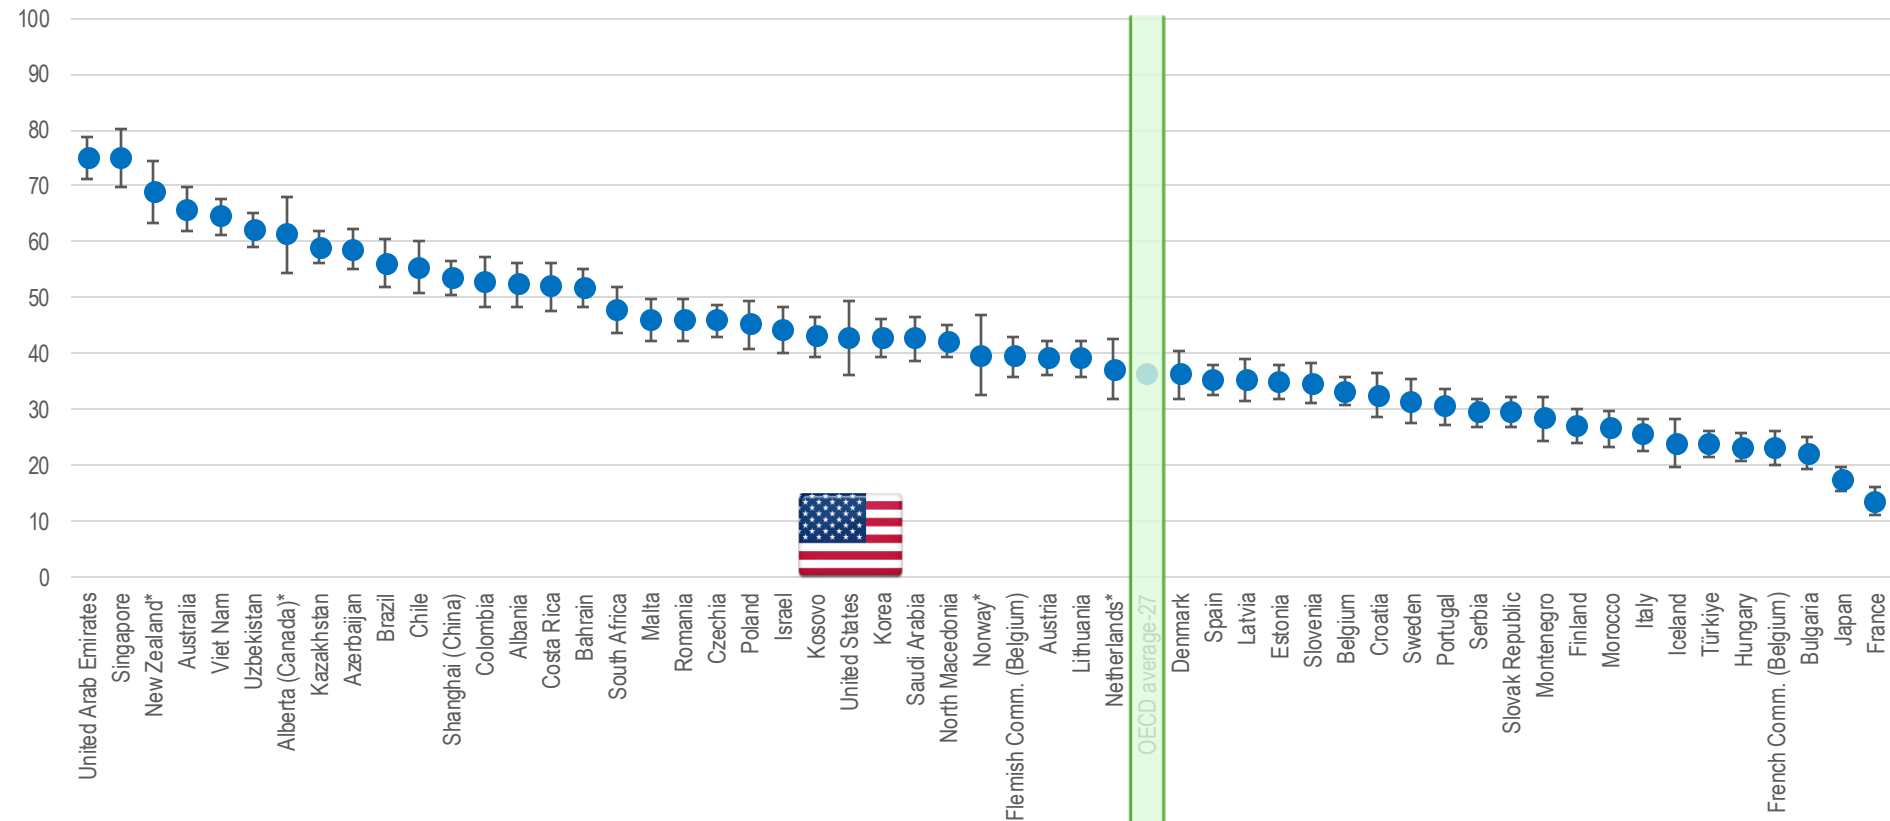

Should AI mark your children's schoolwork?

Teachers use of new technologies

Share of teachers who used AI in their teaching in 2024

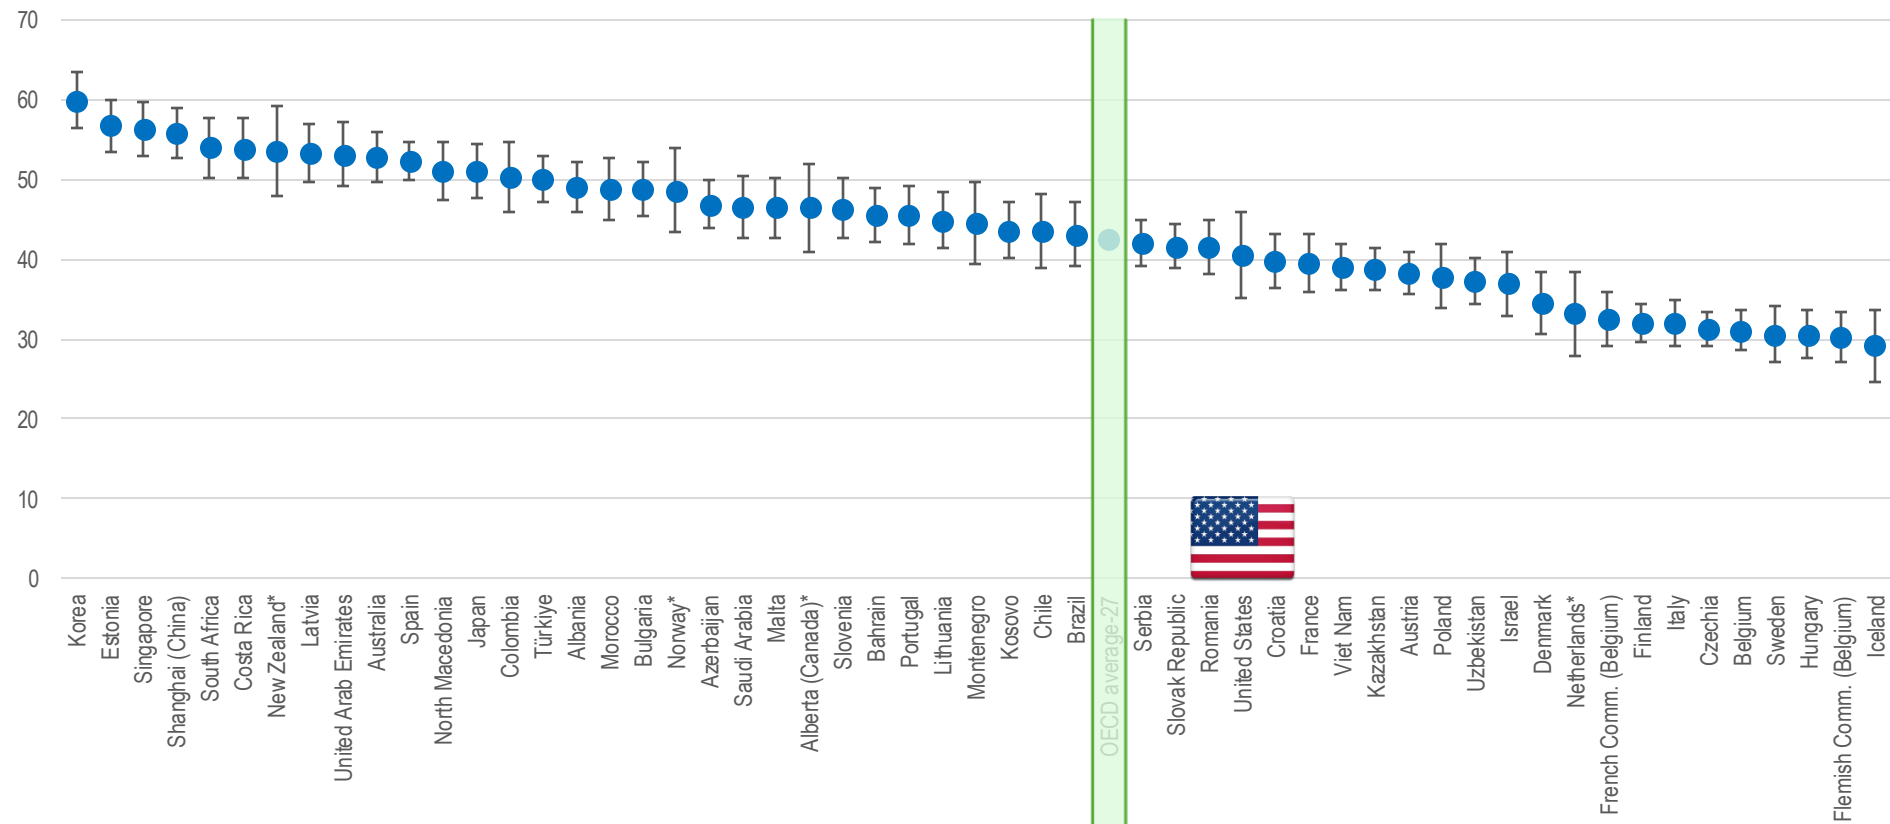

Share of teachers who used AI in their teaching in the last year

Teachers are concerned about AI

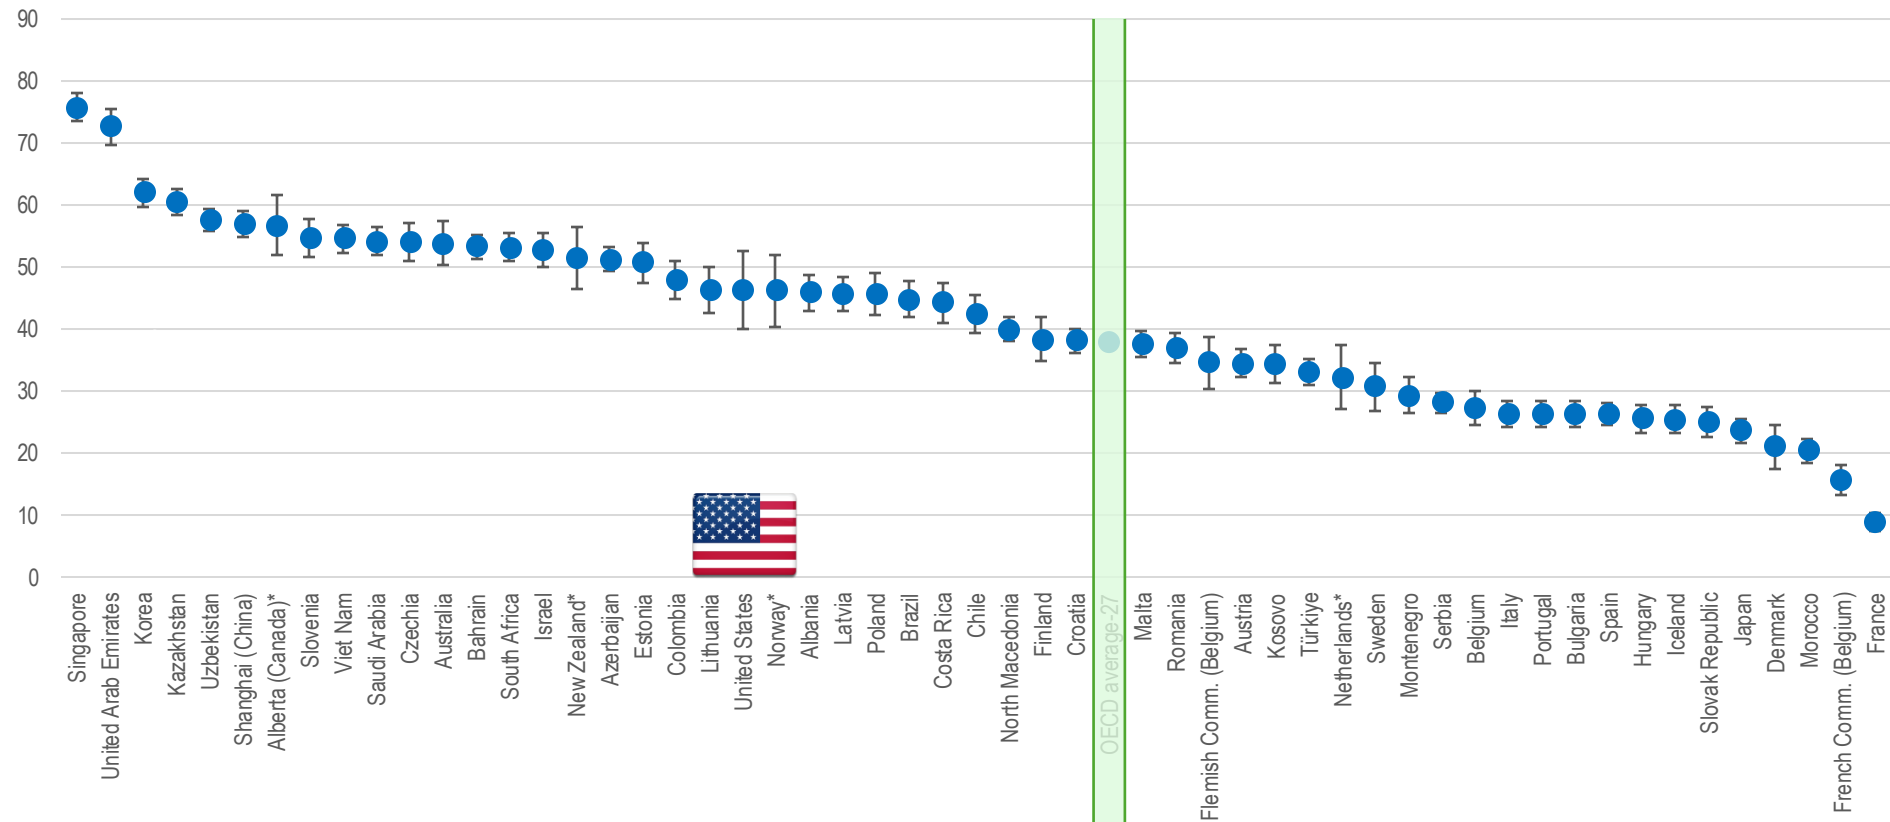

Share of teachers who believe that AI amplifies biases

Where AI is part of professional learning

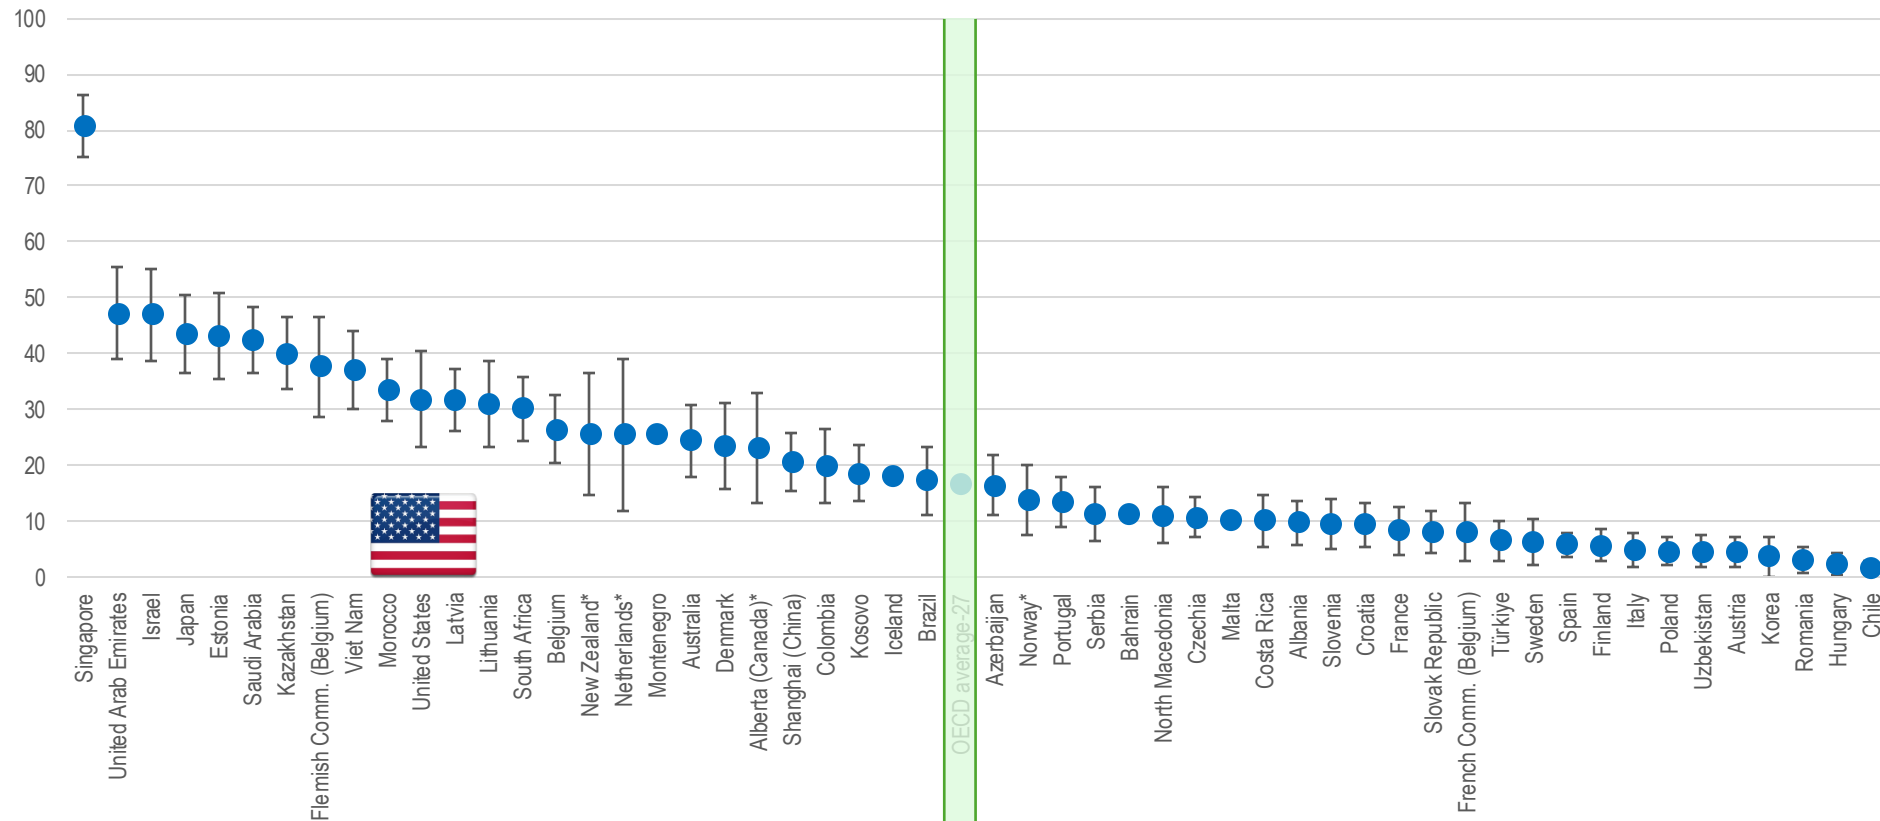

Share of teachers for whom using AI was part of professional learning in the last year

Online and hybrid instruction are here to stay

Share of teachers who taught at least one lesson online or hybrid in the past month

Professional autonomy and a collaborative culture

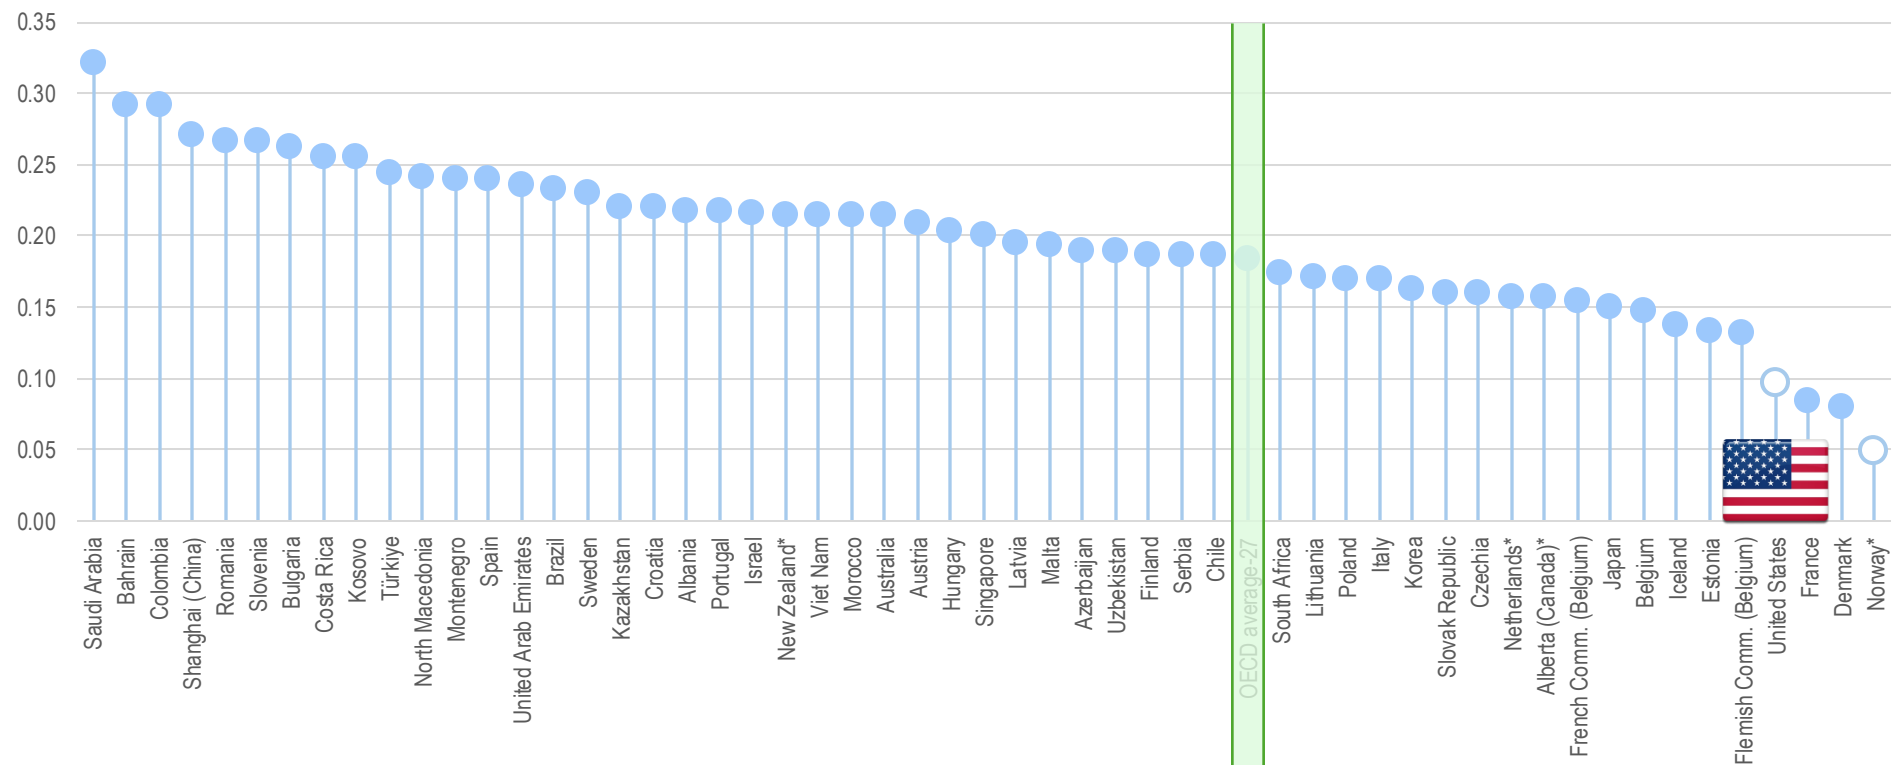

Work organisation and work environment

Teachers like having autonomy

Change in the scale of teachers' job satisfaction associated with an increase in instructional autonomy

○● After accounting for teacher and school characteristics

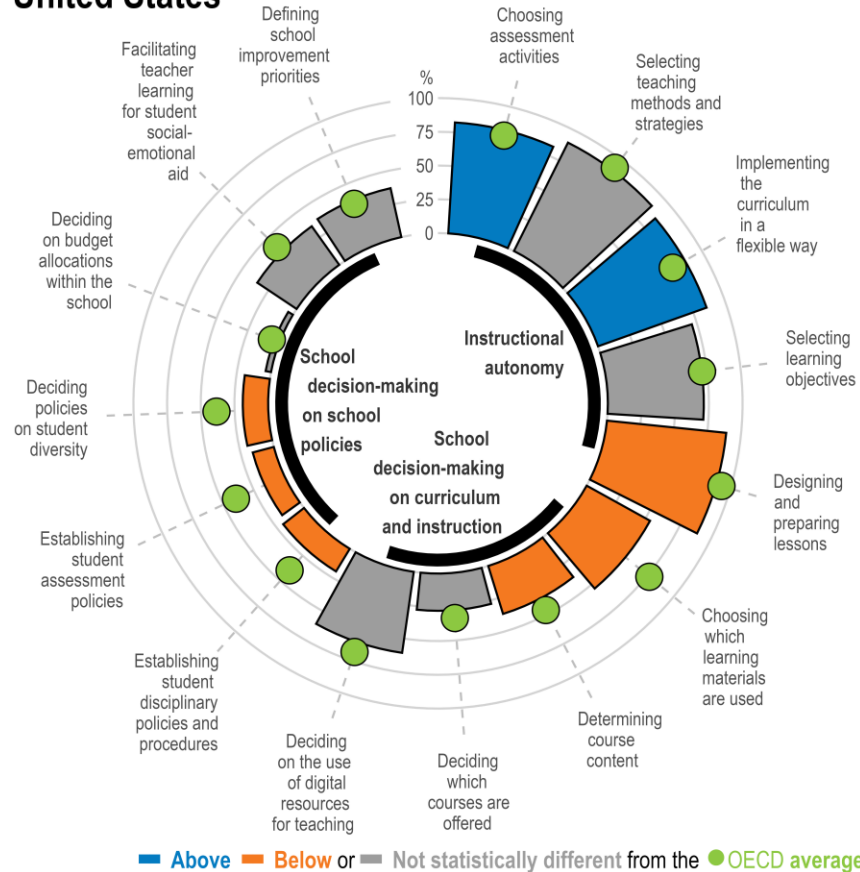

Teachers instructional autonomy and involvement in school-level decision making

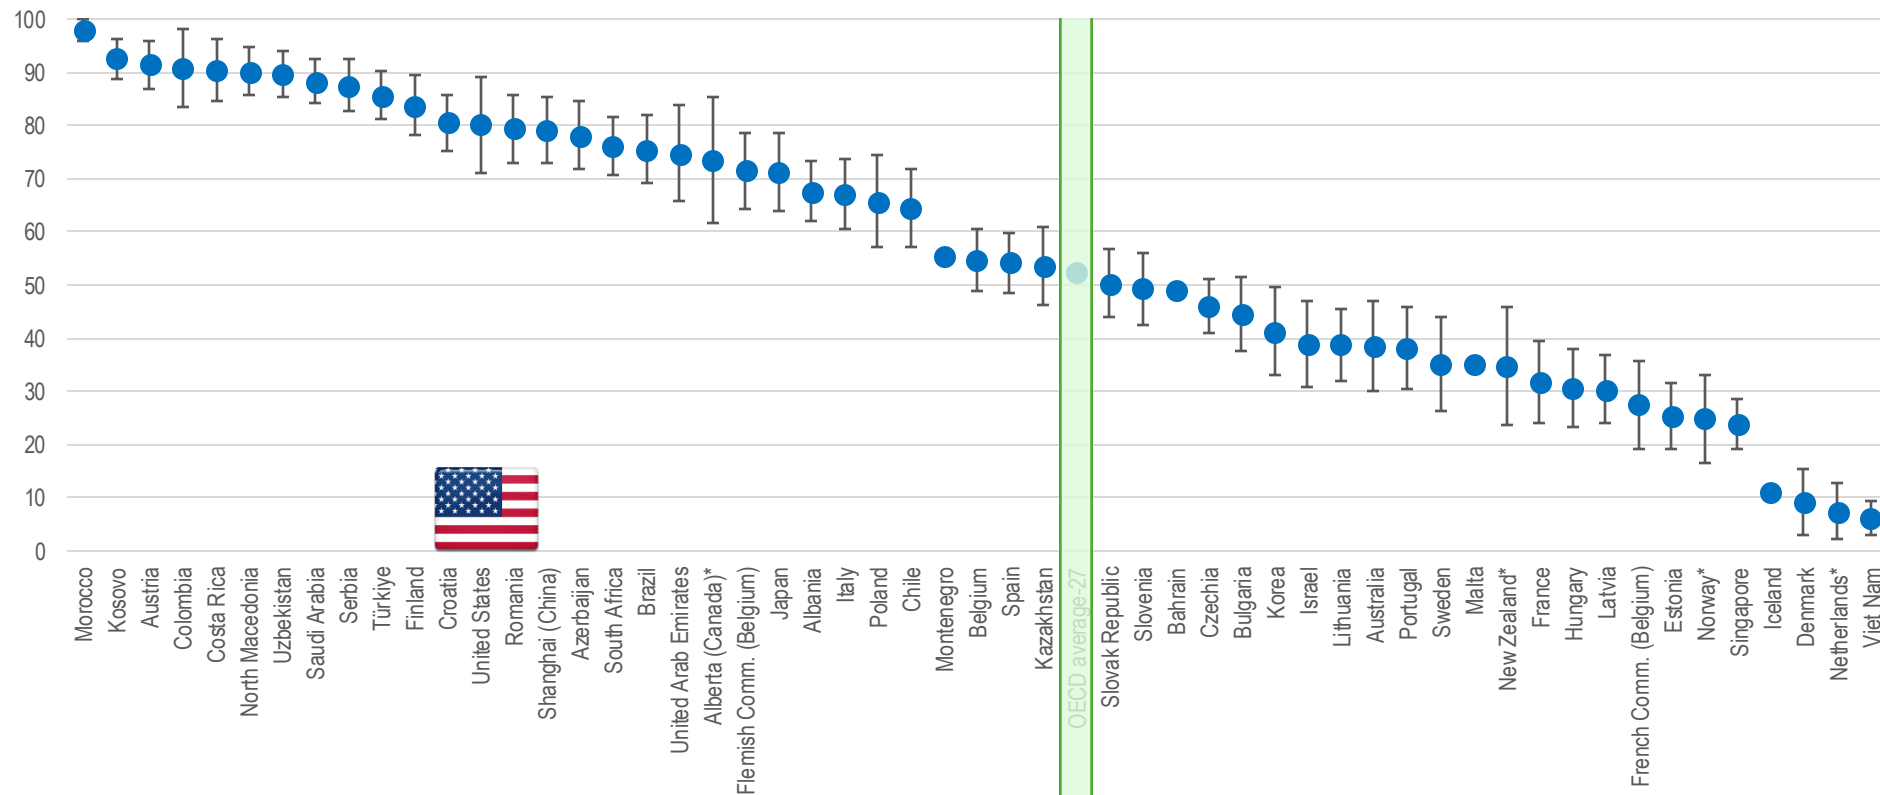

United States

Teachers play a role in the school management team

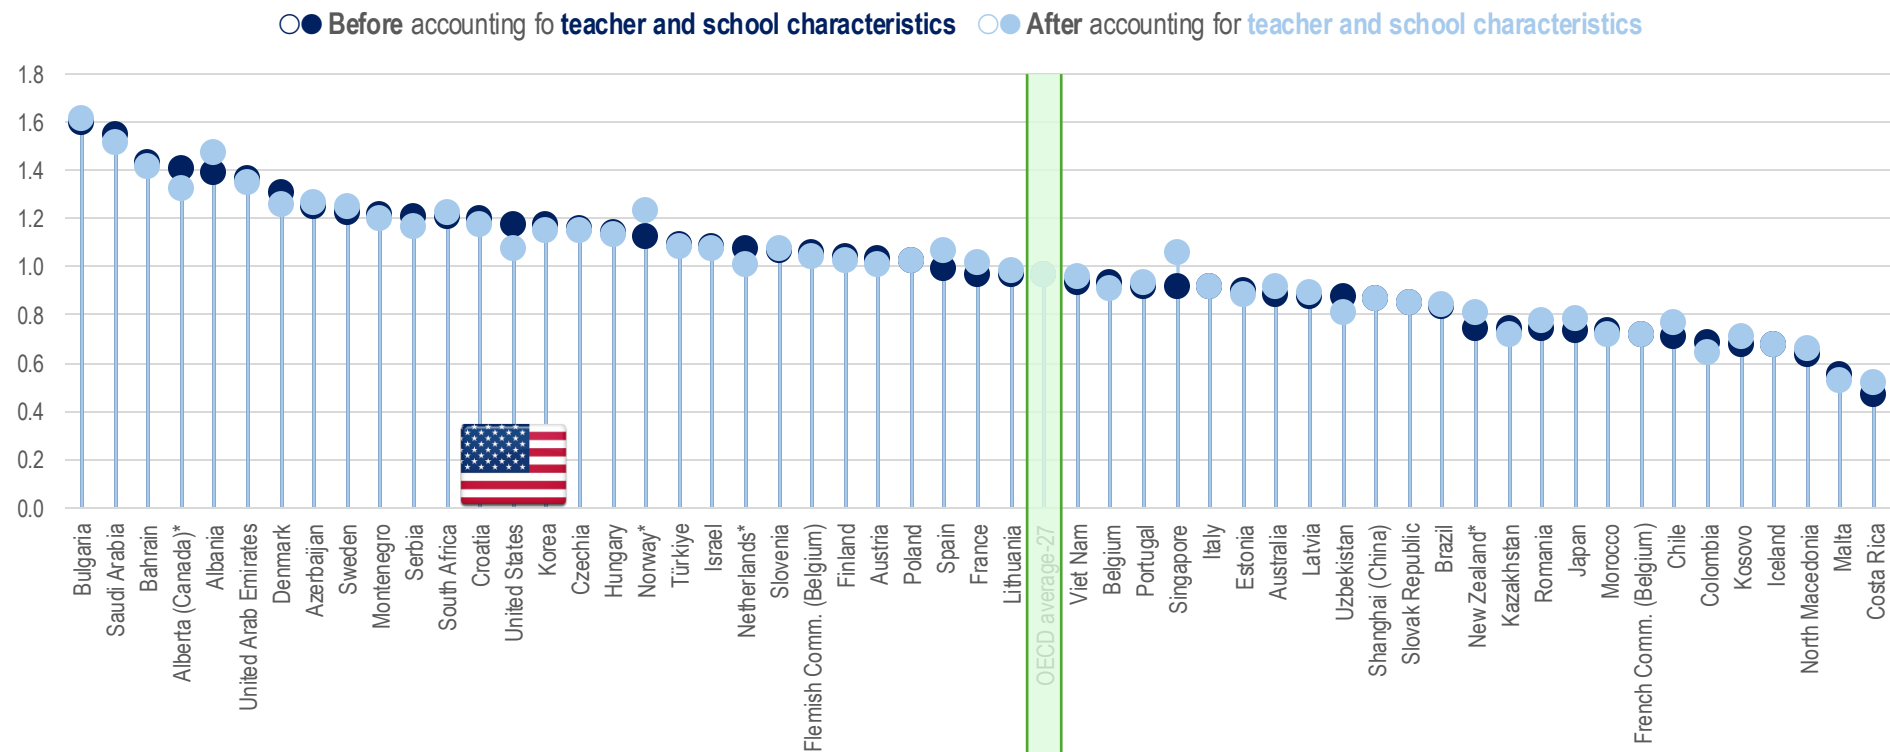

Share of teachers in schools where teachers are currently represented on the school management team

Teachers appreciate the opportunity to participate in school decisions

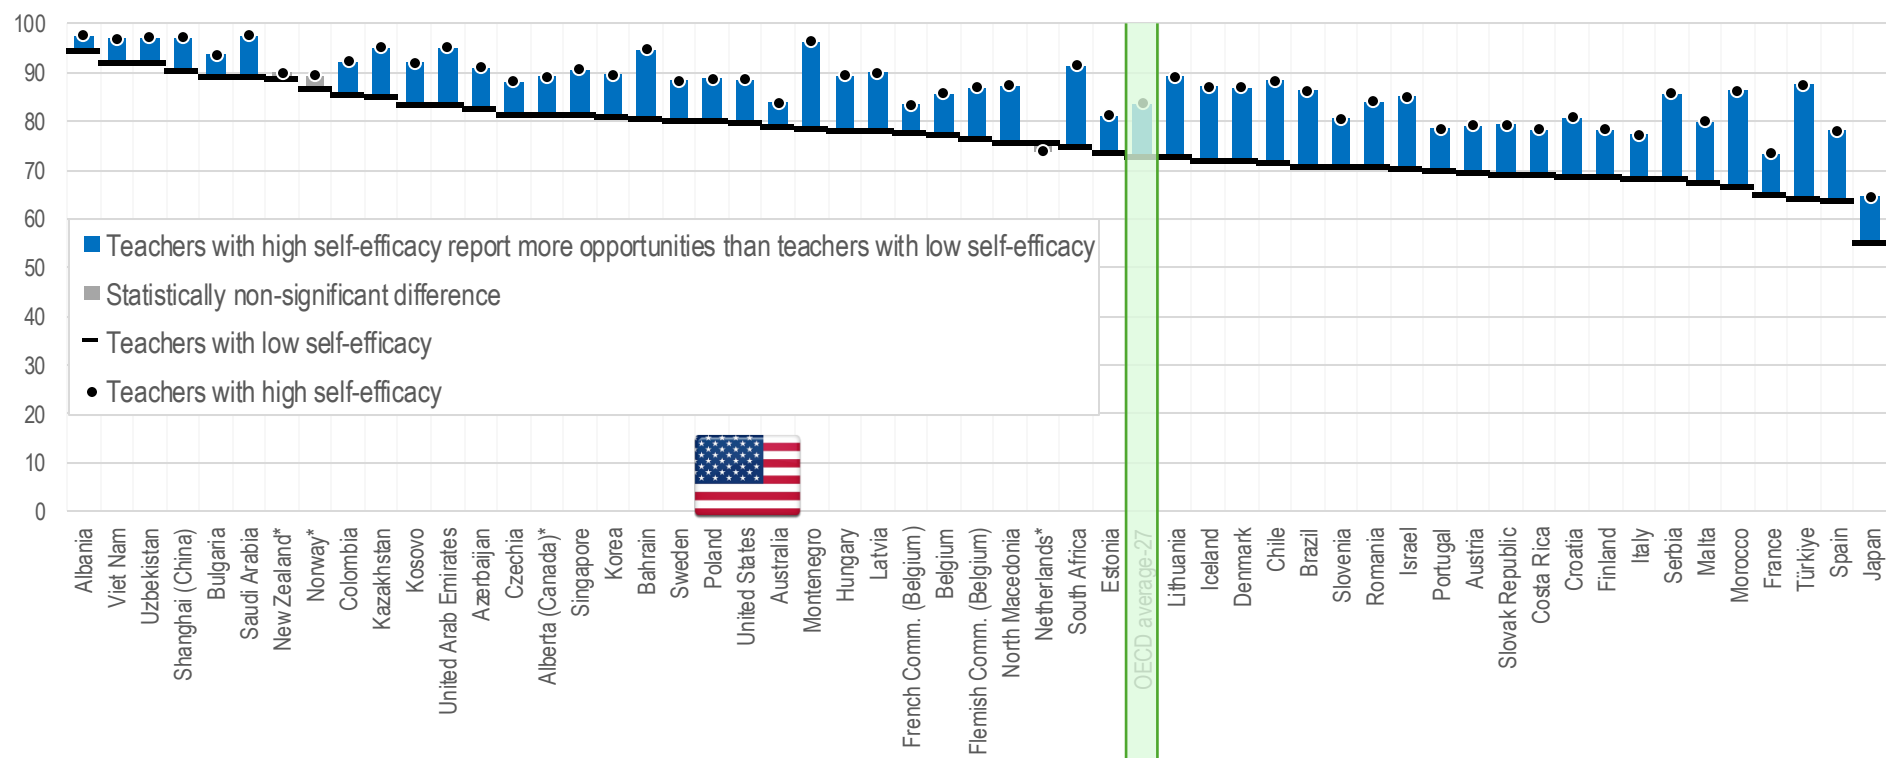

Change in the scale of teachers' job satisfaction associated with teachers reporting that their school provides staff with opportunities to actively participate in school decisions

Teachers with high self-efficacy report more leadership opportunities

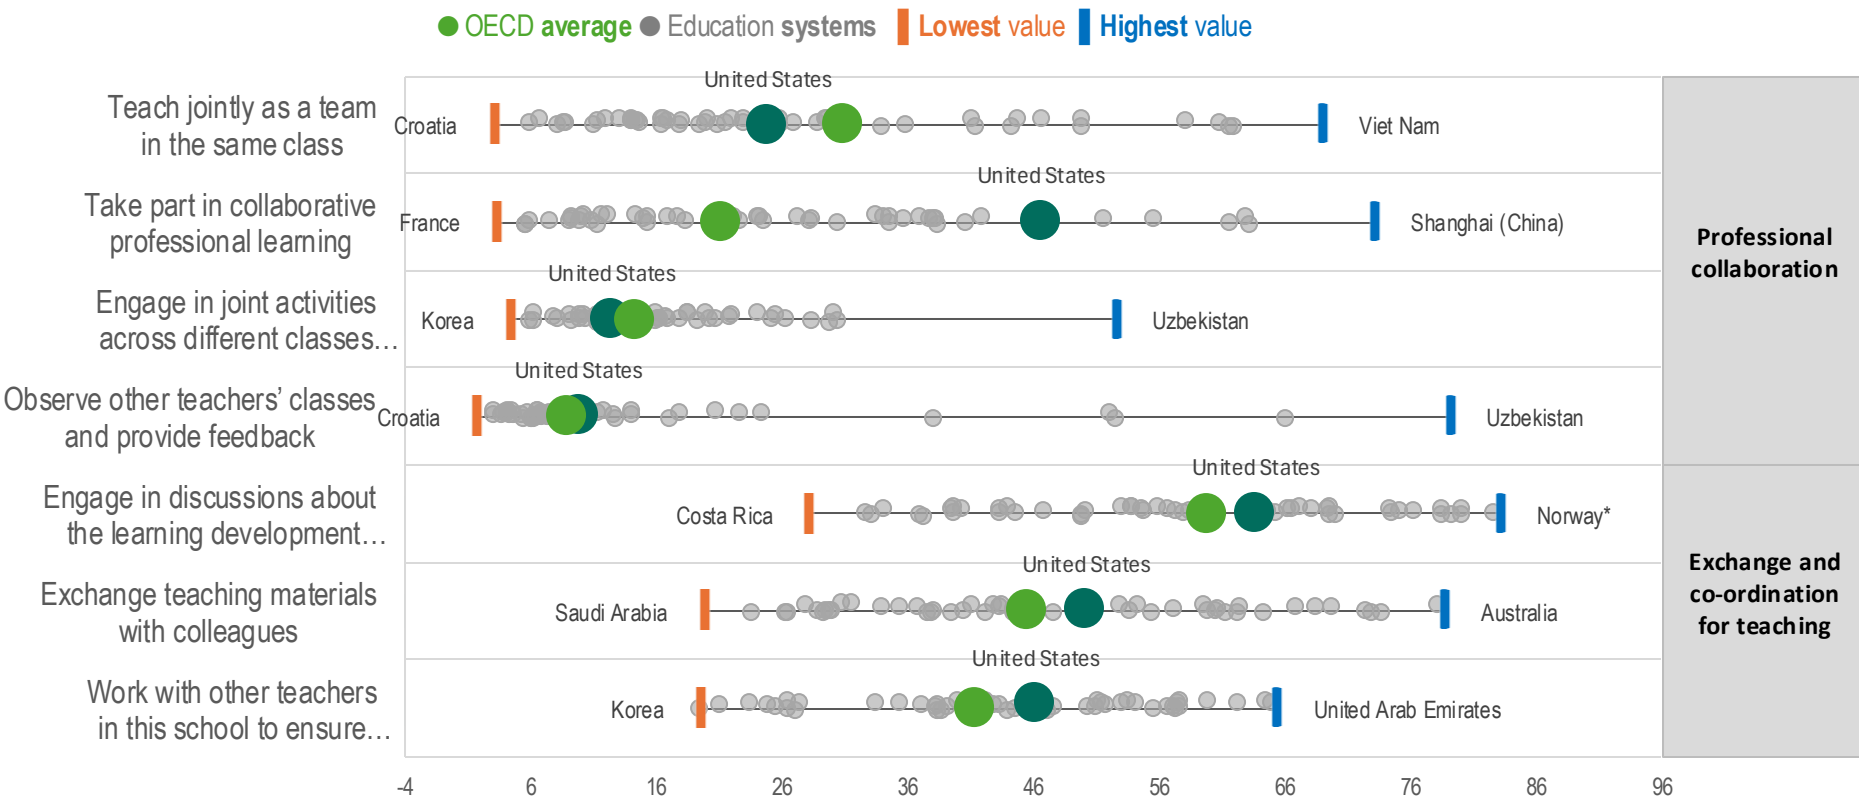

Share of teachers who "agree" or "strongly agree" that their school provides staff with opportunities to take leadership roles in promoting professional learning communities

Teacher co-operation

Share of teachers who do... at least once per month

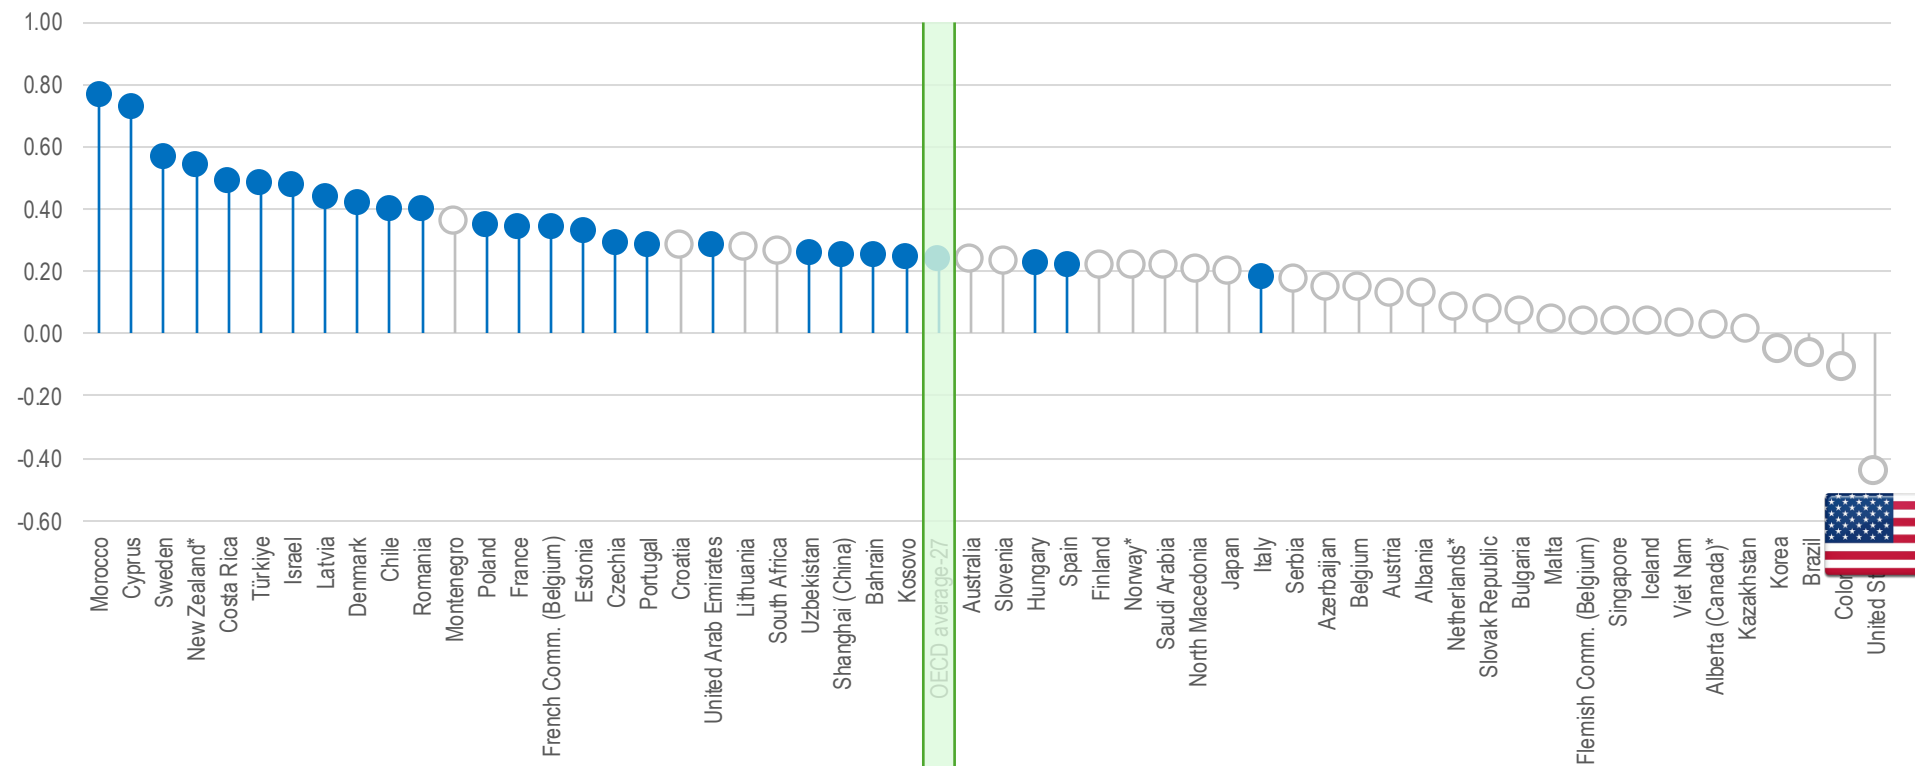

Teachers like working together

Relationship between engaging in joint activities and job satisfaction

● Positive and statistically significant; ○ Statistically non-significant

A photograph of a classroom scene. A female teacher with dark hair, wearing a white long-sleeved shirt and dark trousers, is leaning over a desk. She is smiling and looking at a piece of paper held by a male student. The student has short brown hair and is wearing a grey sweater. He is also smiling and looking at the paper. In the background, other students are visible, some sitting at desks. A large window on the right side of the frame lets in bright light. A black bulletin board with several white papers pinned to it is visible on the left wall.

How do teachers develop their expertise?

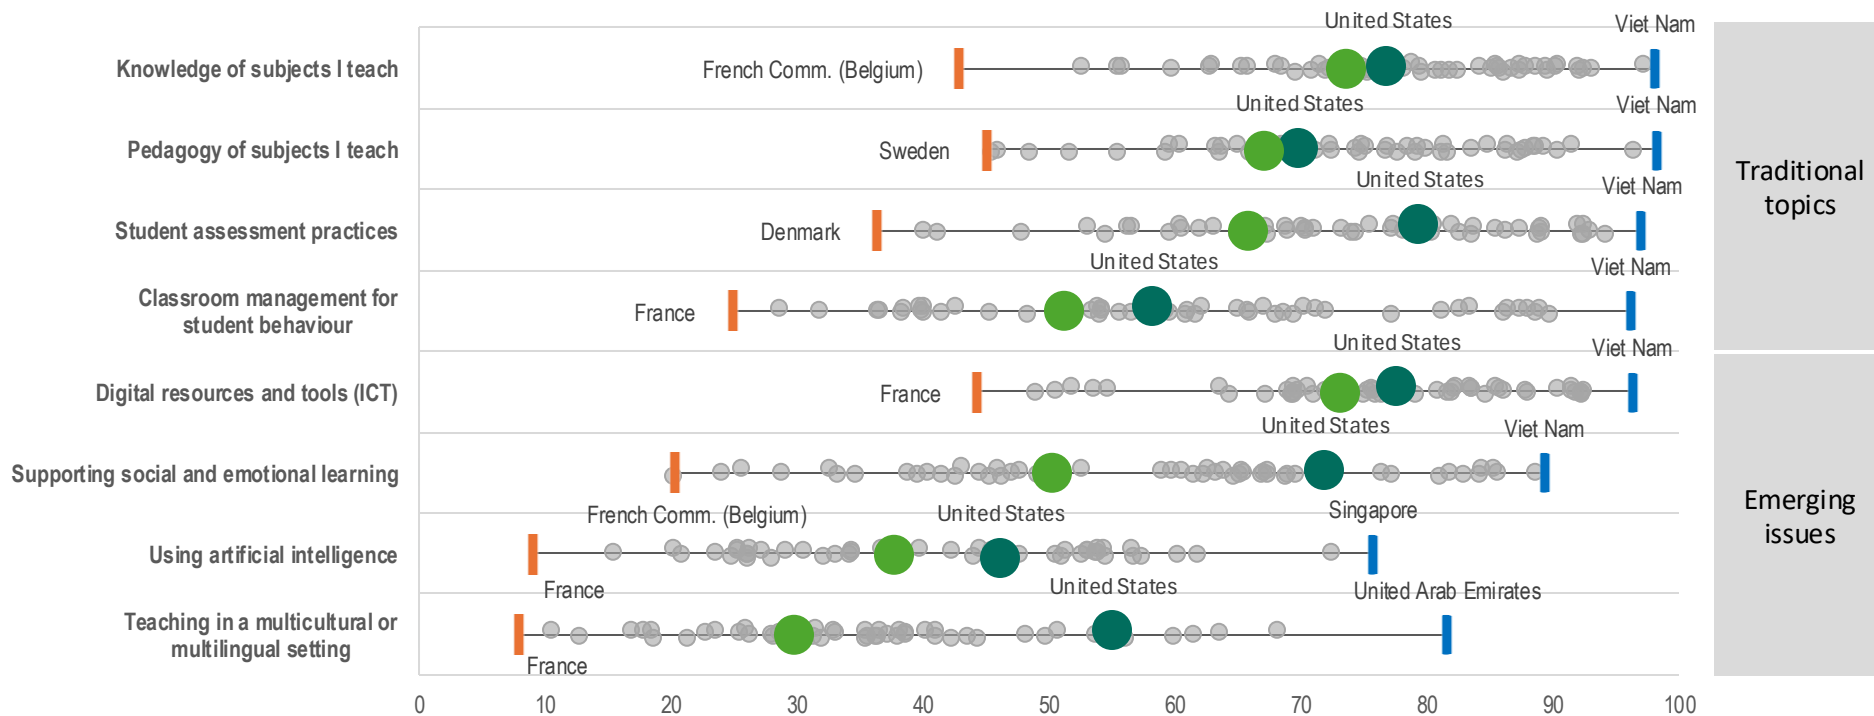

Work organisation and work environment

Professional learning activities tend to focus on traditional topics

Share of teachers who report that the following topics were included in their professional learning activities during the last 12 months

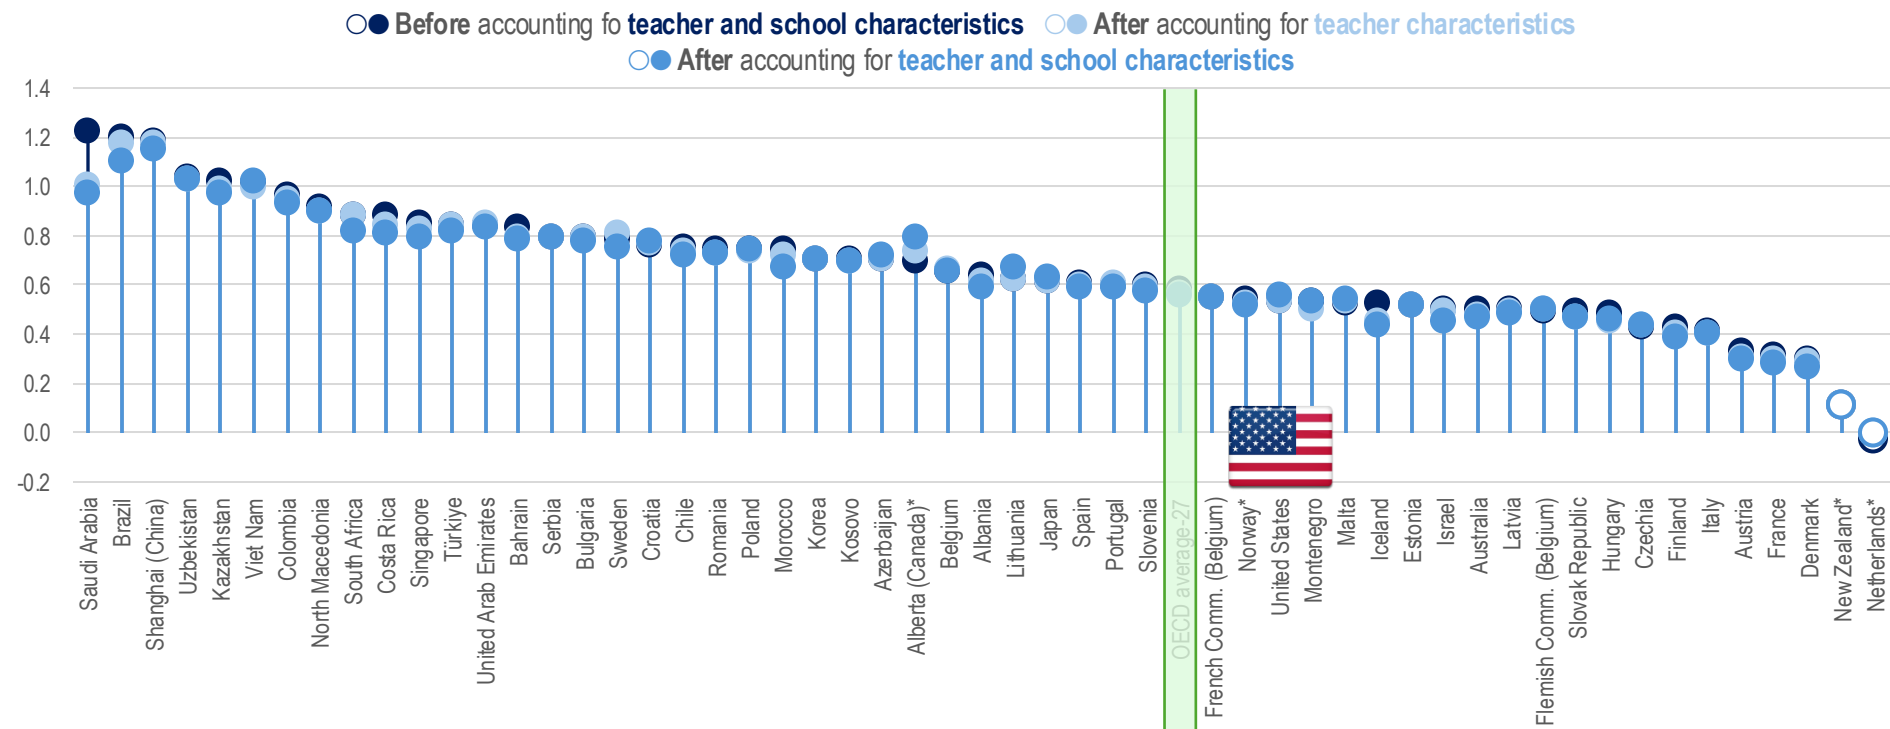

● OECD average ● Education systems | Lowest value | Highest value

Impactful professional learning is associated with meeting lesson aims

Change in the scale of teachers' fulfilment of lesson aims associated with teachers reporting that the professional learning activities they participated in during the last 12 months had a positive impact on their teaching

A photograph of three people in a library or study environment. A woman with long brown hair, wearing a green and white striped shirt, sits at a wooden table on the left, looking towards the other two people. In the center, a woman with long black hair, wearing a red shirt, sits with her back to the camera. On the right, a man with dark hair and a beard, wearing a blue denim shirt, sits facing the woman in the red shirt. They appear to be in a conversation. The background features tall wooden bookshelves filled with books. A semi-transparent pink overlay covers the bottom half of the image, containing the text.

Do teachers feel valued?

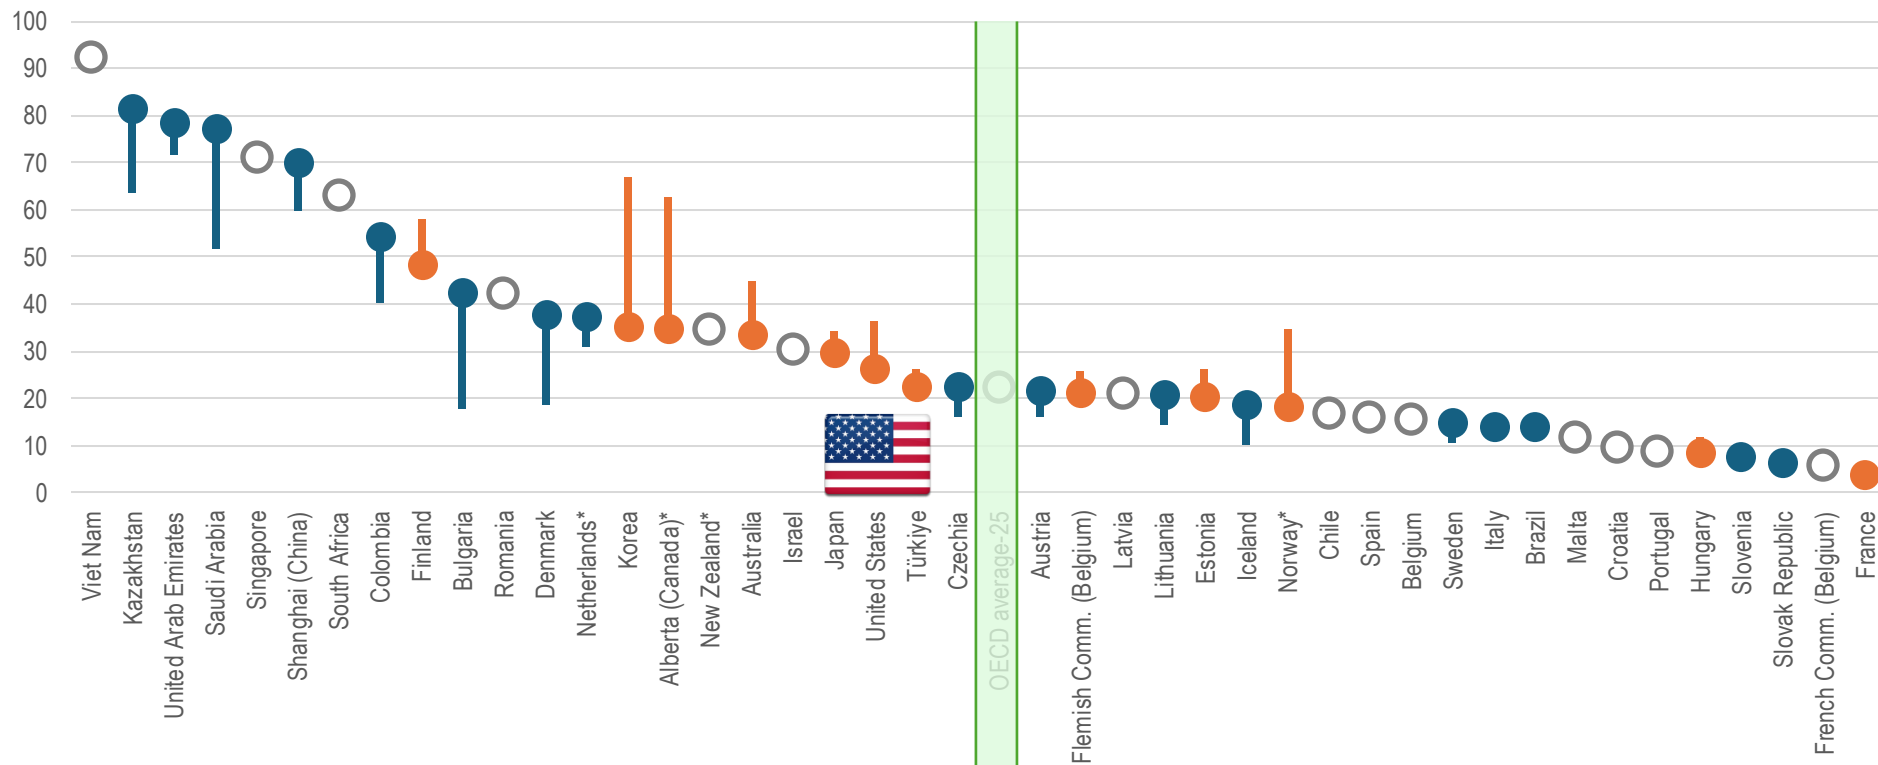

Changing environment

Perceptions of being valued have evolved differently across systems

Share of teachers who "agree" or "strongly agree" that the teaching profession is valued by society

● Increase, ● Decrease and ○ Statistically non-significant change from 2018 (lollipop tail) to 2024 (lollipop head)

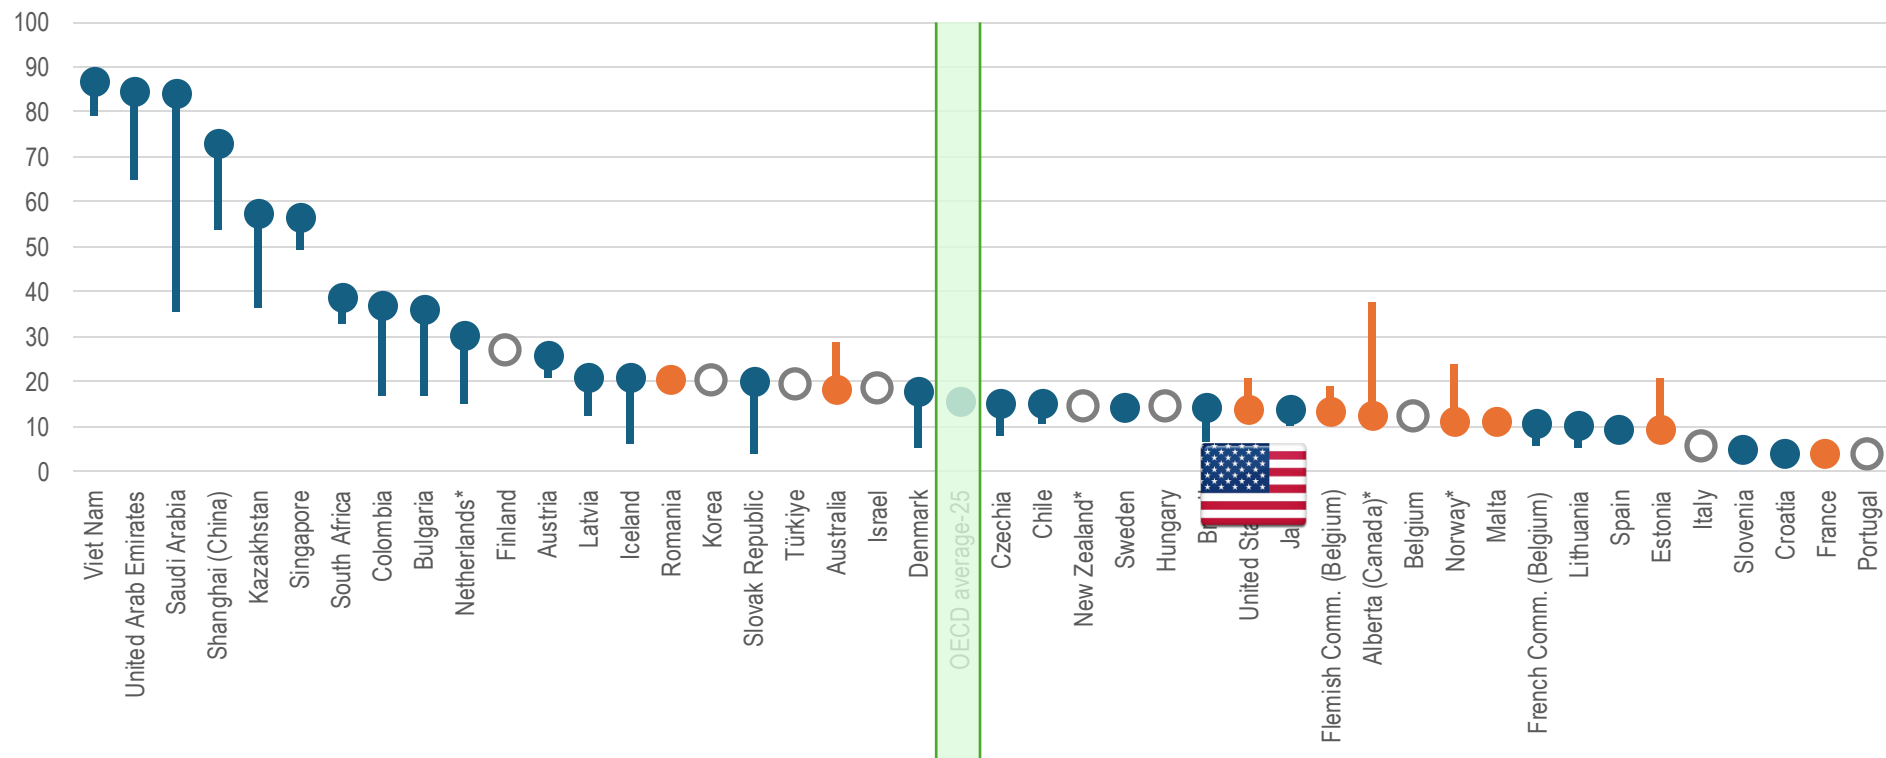

A minority of teachers believe policymakers value their views

Share of teachers who "agree" or "strongly agree" that teachers' views are valued by policymakers

● Increase, ● Decrease and ○ Statistically non-significant change from 2018 (lollipop tail) to 2024 (lollipop head)

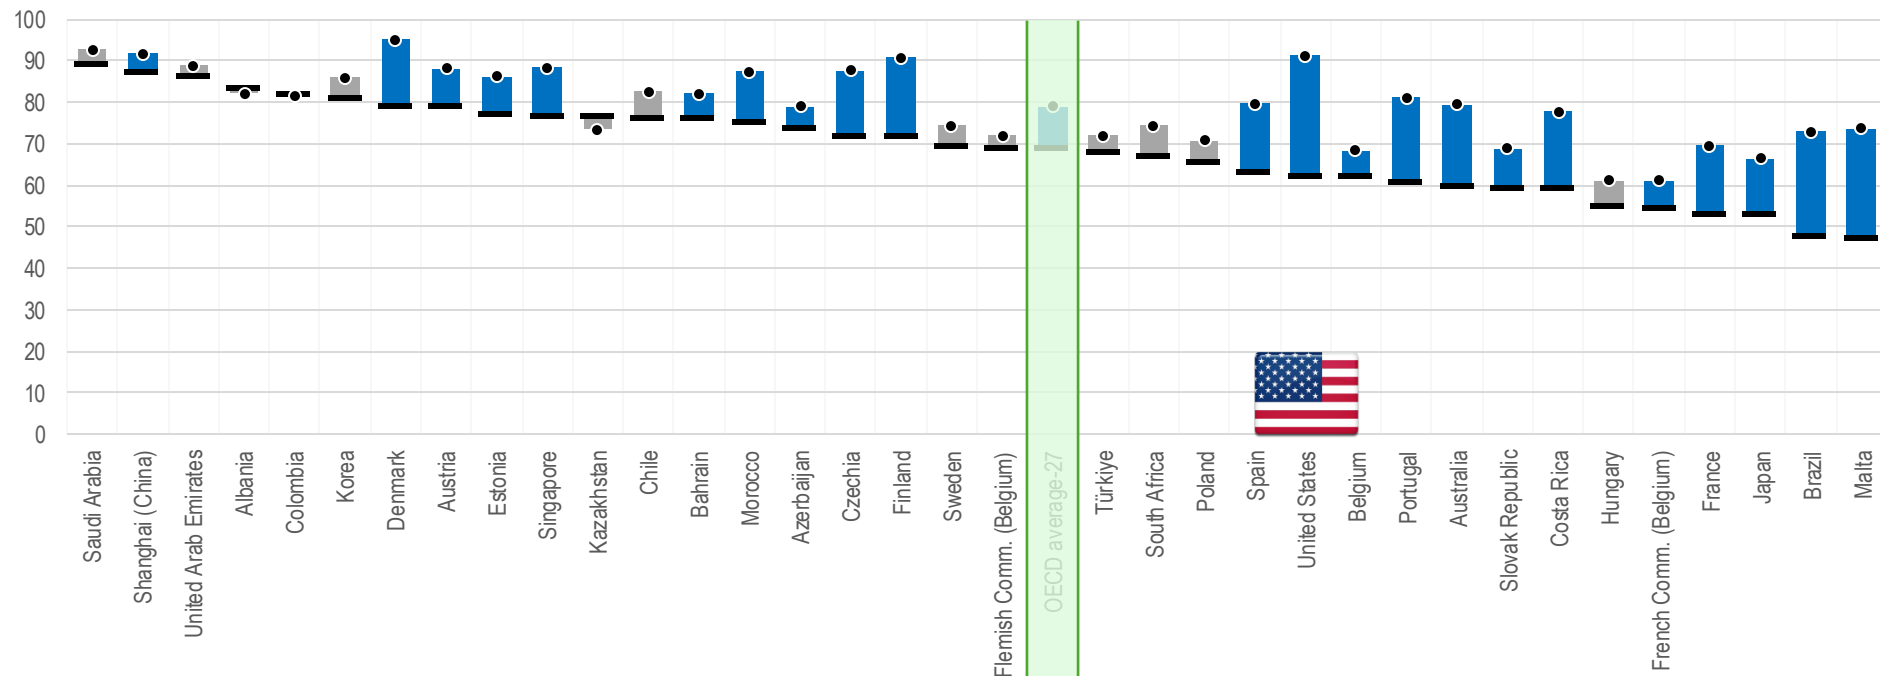

Teachers in private schools are more likely to feel valued by students

Share of teachers who “agree” or “strongly agree” that, in their school, teachers feel valued by students

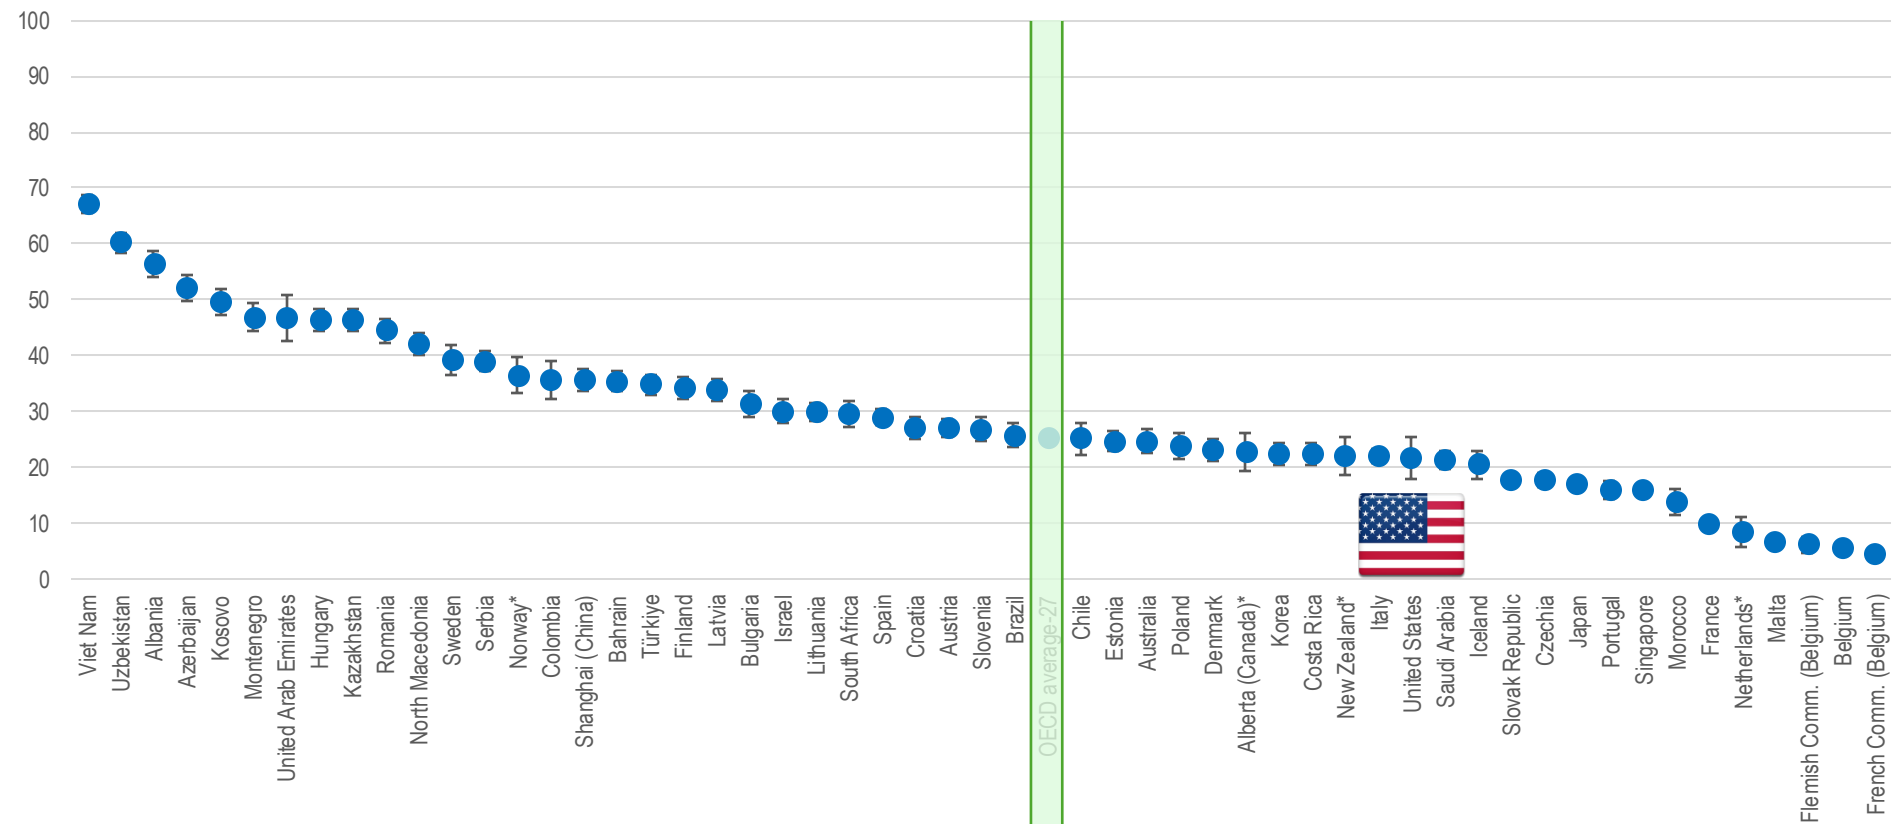

- Teachers feel more valued by students in privately managed schools than in publicly managed schools
- Statistically non-significant difference
- Teachers in publicly managed schools
- Teachers in privately managed schools

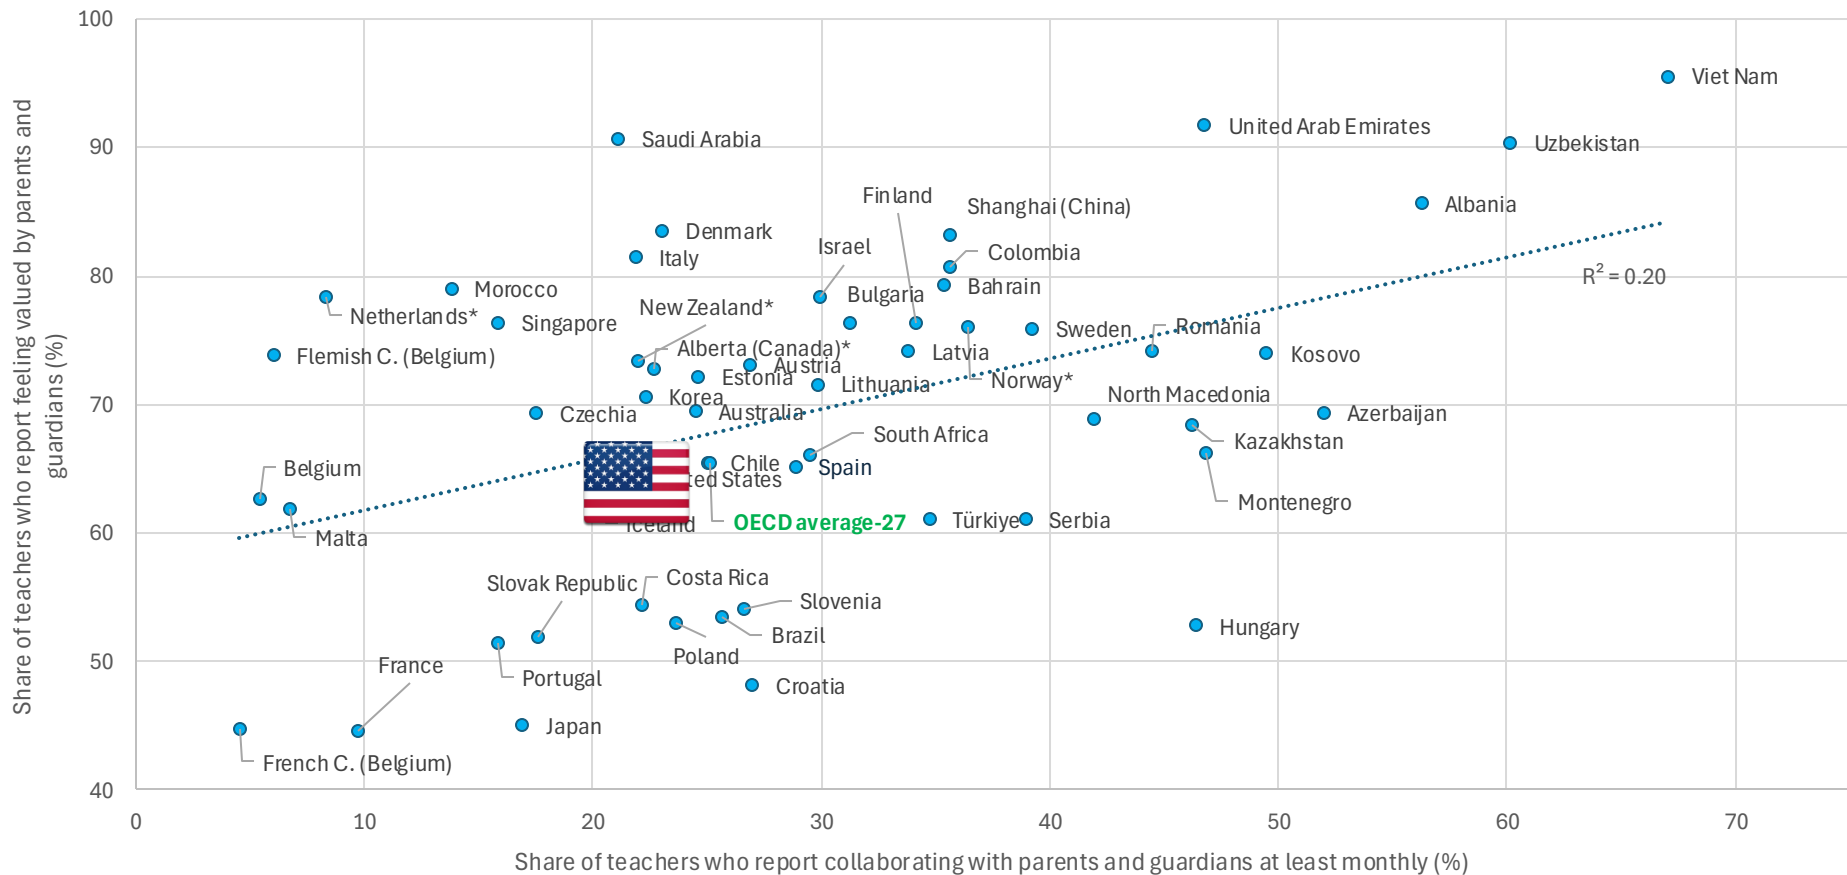

Engagement with parents

Share of teachers who report collaborating with parents and guardians at least monthly
